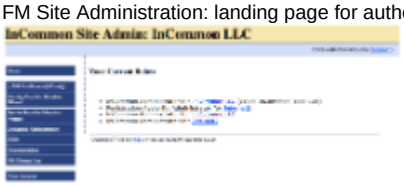
Demo Google Login

In a Progress Report of the Gateway Rollout Working Group, a new Google Gateway infrastructure is described. As of April 2013, the Gateway is integrated with two InCommon service providers: the InCommon Operations Federation Manager (FM) and this Internet2 Spaces Wiki. Below is a series of screen shots that illustrates how a Delegated Administrator is provisioned (via an invitation service) and how that Delegated Administrator subsequently logs into the FM using a Google account.

Standalone documents containing these (and other) screen shots (PPT) (PDF) are attached to this article.

1. FM Site Administration: landing page for authenticated Site Administrators



---

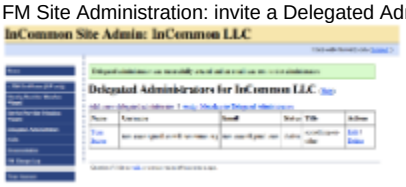
2. FM Site Administration: navigate to Delegated Administration page

---

3. FM Site Administration: invite a Delegated Administrator

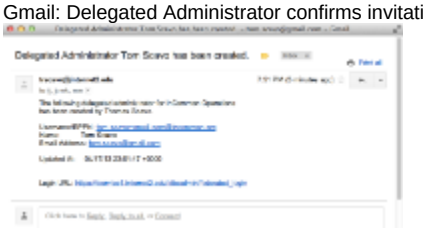
---

4. FM Site Administration: invite a Delegated Administrator: success



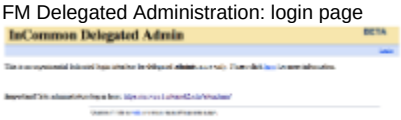
---

5. Gmail: Delegated Administrator confirms invitation



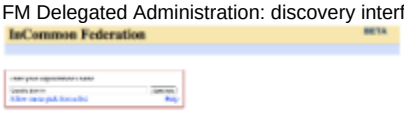
---

6. FM Delegated Administration: login page



---

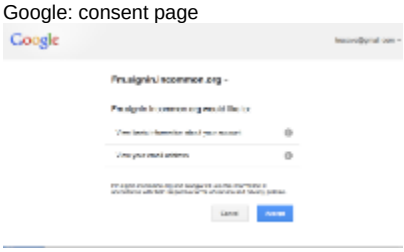
7. FM Delegated Administration: discovery interface



---

8. Google: login page

9. Google: consent page



10. FM Delegated Administration: landing page for authenticated Delegated Administrators
