

Hello Everyone,

Happy New Year! We hope you find this newsletter to be a valuable resource in keeping you informed about the latest developments with the program. Please share this newsletter freely with your teams and other institutions. In this newsletter, I'll be sharing program updates, important announcements, insights from our Service Advisory Board, and information about upcoming events that you might find interesting. Let's dive in!

NET+ Docusign Community News

Did you know that there's a Program wiki page dedicated to all things [NET+ Docusign](#)? This is always a great place to start if you have any questions about program information and announcements.

Events:

We are excited to announce upcoming open hours for the NET+ Docusign community! Join us on February 11 at 1:00 pm ET/10:00 am PT for interactive sessions where you can connect with peers, ask questions, and gain insights into using Docusign more effectively! This call has a theme on API's | [Register here](#)

Missed the NET+ Webinar Series? Don't worry—you can catch up on the highlights and recordings via the [NET+ event page](#). Here's to another year of advancing higher education through collaboration, innovation, and the power of the NET+ community!

Around Internet2 and Beyond

“Quick Reads” from other programs:

- Pathify Joins Internet2 NET+ Program. Read how Pathify revolutionizes your student portals needs | [Read more →](#)
- Globus Joins Internet2 NET+ Program | [Read more →](#)
- Internet2 Events - The [2025 Community Exchange](#) is slated for April 28 – May 1 in Anaheim, California
- Have you explored the new and improved Internet2 [Cloud Scorecard Finder](#)? We get it – the sheer volume of cloud services available to institutions can quickly overwhelm current practices for assessment and procurement. The Internet2 Scorecard is a self-assessment completed by the vendor using standards and best practices developed within the research and education community. [Use these instructions](#) to log in.

DocuSign Announcements

Did you know?

DocuSign has recently updated their product suite to include [DocuSign Intelligent Agreement Management \(IAM\)](#). DocuSign IAM is a cloud-based software platform that helps higher education institutions create, manage, and commit to agreements.

DocuSign IAM can help schools:

- Improve efficiency
- Reduce risk
- Unlock additional value from agreements
- Commit to agreements faster and more securely

For example, DocuSign IAM can support Student Enrollment challenges such as:

1. Delays due to difficult-to-view (and fill out) PDFs
2. Multiple rounds of back-and-forth
3. Student fear of entering sensitive information without adequate security

[DocuSign IAM for Customer Experience \(CX\)](#) was developed to help higher education institutions within the Internet2 NET+ Community to streamline student enrollment through:

- **ID Verification**: Verify student IDs at enrollment
- **Web Forms**: Auto-populate student data into forms for easier submissions
- **Multi-Channel Delivery**: Notify students of forms via SMS

All to help eliminate manual tasks and collect information through dynamic web forms, no-code workflows, and secure digital signatures.

Want to learn more about [DocuSign Intelligent Agreement Management \(IAM\)](#)?

Reach out to Internet2 to connect with your DocuSign account team to discuss how to purchase through the NET+ Program.

NET+ Docusign: Winter 2025 Newsletter

Thank you, and Happy 2025!

If you're still reading, thanks for making it this far! I'd love to hear from you at netplus@internet2.edu if you have questions or ideas about the NET+ Docusign program. If you have concerns related to pricing, order forms, agreement terms, etc. let us know.

Kind Regards,

Jenna Mallberg, MBA
Associate Program Manager
