NET+ BPLAC Meeting Summary

December 8, 2021

Attendees: Matt D'Emilio, Bobby Clark, Carrie Shumaker, Lester Greenman, Berni Kenney, Sean O'Brien, Tara Gyenis, Sue Gavazzi, John Krienke, Loren Malm

- Tara introduced the [draft NET+ Service Survey](#) and asked for feedback. Members' comments included edits to questions, introductory information to include with the email, and requests to share the survey results.
- Sean and Sue discussed the emergence of state level security assessment regulations and programs, including [StateRAMP](#) and [TX-RAMP](#), and their alignment with FedRAMP. Berni noted that Virginia offers an [Enterprise Cloud Oversight Service](#) to public institutions. Other members are not aware of any similar regulations/programs in their respective states at this time. NET+ members will continue to monitor this space for any implications to current or future service offerings.
- Sean provided an overview of the [NET+ Community groups](#) and their respective functions. He asked members to reflect on whether there are any groups missing from the current NET+ community ecosystem. Members discussed how BPLAC can connect and further build community amongst the groups with the lack of in-person opportunities. Carrie suggested providing links to each other's agendas and notes. The committee will begin the process of formally approving meeting notes in 2022 for Sean to then circulate.
