**NET+ BPLAC Meeting Summary**

May 11, 2022

Attendees:  Loren Malm, Matt D'Emilio, Bobby Clark, Lester Greenman, Maura Austin, Berni Kenney, Nikki Maloney, John Krienke, Kevin Morooney, Sean O'Brien, Sue Gavazzi

- Members approved the April 2022 Summary notes with no changes and agreed to posting previous summaries on the Spaces page.
- Sean provided a demo of the new NET+ home page which will launch in a few weeks. Features include marketing information targeted to procurement roles, self-subscribing mailing lists, and a NET+ Cloud Services Guide.  Members provided feedback and were overall pleased with the new features.
- Bobby furthered the conversation from April on vendor management, asking members for recommendations on actions the committee and NET+ can take to provide value to the community in this space.  Members identified subject areas including accessibility, privacy, and data anonymization.  Members agreed to focus future meetings by topic and identify specific deliverables.  One example was to review language in the NET+ Customer Agreement template for potential updates to sections in the subject areas. Members offered to share contract documents pertaining to security requirements.
- Sue asked members for a list of conferences they may attend this year to see if there is a potential for the committee to meet in person.  Most members were interested in meeting at Educause or at Internet2's office in DC.  Loren is on the Educause ITPSM steering committee and offered to get information on opportunities at that conference.
