Configuring InCommon FM in the Gateway Manager (Beta)

Gateway Manager

Welcome to the **Gateway Manager**. This system allows you to configure your Service Providers (SPs) to use the Google OpenID Gateway. The SPs you are authorized to configure are listed in the **My Service Providers** section, below.

My Service Providers

- fm.incommon.org/sp
- moodle.idcorral.com/shibboleth-sp

Don't see the entityID for one of your service providers? Please contact gateway-support@cirrusidentity.com.

Manage

fm.incommon.org/sp**SP Setup****SP Setup****Settings**

Note: Since this is the first time configuring this SP, please verify the Description and Support Email (which come from the InCommon metadata). Then set how you want the **ePPN** to be formatted, and whether or not this SP requires that users be invited via the Invitation Service.

Description ⓘ

The InCommon Federation Manager is a web application for managing InCommon Federation metadata.

Support Email ⓘ

techsupport@internet2.edu

ePPN Configuration ⓘ

- Email Address:** Set the ePPN to be the email address of the user, e.g., **username@gmail.com**
- Gateway-Specific ID:** Set the ePPN to be a combination of email address, with the domain of this gateway as the scope, e.g., **username+gmail.com@incommon.org**

Invitation Service ⓘ

- Require users of the gateway to be invited in order to access your SP/application.
