Higher Ed Cloud Community

The higher education cloud computing community is an active, thriving, sharing conversation between schools, community partners and individuals. This community focuses on the infrastructure (IaaS) and platform as a service (PaaS) ecosystems. It is built for higher ed, by higher ed. We welcome all to participate with an understanding that the goal is to promote the most secure and efficient use of cloud computing in support of the mission of our institutions. While we welcome the cloud vendors to participate in the debate and sharing of information it is never to be used for sales.

As the use of hyper-scale computing at community colleges, colleges and universities grows, so do the questions, challenges and lessons learned by each of us. Efforts to share those challenges and lessons and to ask those questions are also growing. This site attempts to bring together those conversations and the resources they produce in the hope that you will engage and encourage your colleagues to engage. Together we will raise our institutions’ collective CloudIQ.

<td>EDUCASE Cloud Computing Community Group (CCCG)</td>
<td>The Cloud Computing Community Group provides participants with the opportunity to learn about and discuss the challenges and opportunities associated with the adoption of cloud computing in colleges and universities. Examples of discussion topics include cloud contract negotiation and management, cloud vendor relationship management, IT service management practices, compliance and legal issues, data privacy and security considerations, cloud identity and access management, cloud service integration (cloud to cloud and cloud to on-premise), skills and staffing implications, and cloud use cases to enable institutional agility, efficiency, and innovation. This group meets virtually every month, in person at the EDUCUSE Annual Conference and uses its list and Slack workspace to discuss issues throughout the year. The Cloud Computing Community Group and Internet2 have long partnered to cultivate the cloud computing conversation in higher education. Beginning with the EDUCUSE/Internet2 Joint Cloud Working Group, Internet2 has provided infrastructure and logistical support to the CCCG. Internet2 hosts the CCCG monthly calls and their meeting artifacts as well as the Higher Ed Cloud Wiki.</td>

Monthly meetings

- **Format:** Alternate between presentations one month to open discussion the next
- **When:** Occurs the fourth Wednesday of the month at 9am PT/12pm ET.
- **Where:** https://internet2.zoom.us/j/91519802344
- **Running Agenda/Notes:** https://tinyurl.com/EDUCAUSE-CCCG
- **Download calendar invitation:** https://drive.google.com/file/d/1NuRkKDAq5a7vdudAzTgwXChnyIKbTwG/view?usp=sharing (Note for Google Calendar Users: Download the .ics file. Go into the Settings inside Google Calendar. Select Import and navigate to the downloaded .ics file. It should import it into your calendar.)

**2024 dates/times:**
- Jan 24, 2024 12:00 PM Eastern Time (US and Canada)
- Feb 28, 2024 12:00 PM
- Mar 27, 2024 12:00 PM
- Apr 24, 2024 12:00 PM
- May 22, 2024 12:00 PM
- Jun 26, 2024 12:00 PM
- Jul 24, 2024 12:00 PM
- Aug 28, 2024 12:00 PM
- Sep 25, 2024 12:00 PM
- October meeting in person at EDUCUSE Annual. Date/time TBA.
- Dec 4, 2024 12:00 PM (combined Nov/Dec meeting to navigate holidays and conferences)

Internet2 staff support:

  bflynn@internet2.edu
- Sean O'Brien
  sobrien@internet2.edu
The Cloud Forum is an annual gathering hosted by the higher ed cloud crowd that began at Cornell University in 2015. This event brings together the IT professionals who manage cloud computing at many of the top research and education institutions around the country. Attendance is strictly limited because we gather in a single auditorium-style classroom. Thanks to the intimate setting and higher education IT's history of sharing, the conversations are candid, productive and often quite entertaining. We share successes, failures and lessons. We challenge our peers with the problems we are facing in hopes of tapping the wisdom of the crowd.

The event is for higher education, by higher education. We invite the cloud computing vendors most widely used by higher education to send representatives, but they do present. They are there to listen and learn about higher ed’s cloud challenges.

After 2021 the Cloud Forum left its nest and hit the road with the assistance of Internet2. The 2022 Cloud Forum was held at Washington University in St. Louis and 2023 will be at Emory University in Atlanta. For details see: https://internet2.edu/cloud-forum.

Bob Flynn – Chair
bflynn@internet2.edu

Internet2 Events
Webinars, workshops, training sessions, and community gatherings all fit within our mission of supporting and expanding the community. Internet2 works to convene the community to help institutions and colleagues share solutions and best practices.

These include
- I2 Online (I2O) - A series of webinars to showcase the community's work and share knowledge around cloud technologies to help facilitate their use in the research and education community.
- Internet2 Community Building (I2) - Community convening with the goal of tackling cloud technology challenges together.
- NET+ (I2 NET+) - Meetings, Town Halls, and other discussions that take place as part of the Internet2 NET+ program for subscribers that are opened up for the broader community or have the recordings posted afterwards.

Bob Flynn
bflynn@internet2.edu

View upcoming or suggest event topics

Organic Community Topics (COMM)

Anytime a conversation is taking place that would benefit from the involvement of that organization's peers in the higher ed cloud community, we will try to share it here. That could be a request from a number of schools to have another school share what they are doing or one school might have invited a cloud provider in for a demonstration. Whatever the case, if it is information sharing and collaboration at its core (rather than sales) we welcome its inclusion here.

| 12/6/2023  | CCCG Monthly Call - Monitoring in the Cloud                            | Monitoring complex systems anywhere can be complicated and it can be that much more difficult in a hybrid world. In this session we’ll hear from 2 schools about their monitoring stacks and how it helps them work in the cloud (and on-prem). Lehigh University is using the Elastic stack and The University of Florida uses the Grafana/Prometheus stack. After a brief presentation we’ll have time for an open discussion on monitoring in the cloud. | • James Monke – Lehigh University  
• Eli Ben-Shoshan – University of Florida  
• Nicholas Cecere – University of Florida | CCCG                                                      |
| 11/15/2023 | NET+ AWS Quarterly Strategy Call - How Athletic Departments can use the Cloud to gain an advantage | Athletics departments are swimming in data - photos, videos, ticket sales, demographics, player stats and more. Much of these data are siloed, often trapped in servers sitting under desks. What if that data could be gathered together and analyzed to improve player success, team outcomes, engage fans and alumni, and improve the bottom-line? Join us to learn how the University of Pittsburgh is using AWS to create Fan360 - a database to better understand their university’s fanbase, improve marketing, better target alumni outreach, and increase ticket sales. | • Joe Mulford - Amazon  
• Richard Turnquist - Univ of Pittsburgh  
• Chad Burton - Univ of Pittsburgh  
• Brian Pasquini – Univ of Pittsburgh | I2                                                      |
| 11/7/2023  | NET+ GCP Quarterly Town Hall - HPC on CGP                             | Google Cloud provides a comprehensive and highly capable platform for scientific and high performance computing. In this session we will provide an overview of the platform, its unique capabilities as well as the partner ecosystem Google has built. Furthermore, we will discuss the substantial impact the platform can have on computationally-driven research across a variety of scientific domains. | • Volker Eyrich – Google | I2                                                      |
| 10/10/2023 | CCCG Annual In-person Meeting                                         | CCCG October Meeting to be held at EDUCAUSE Annual Conference 2023  
Cloud Computing Community Group (CG) Meeting (Open to All)  
Tuesday, October 10 | 11:15AM–12:00PM CT | W192A, LEVEL 1  
Join this discussion on the challenges and opportunities associated with cloud computing. Topics will include contract negotiations, vendor relationship management, compliance and legal issues, data privacy and security considerations, identity and access management, service integration, skills and staffing implications, and cloud use cases that enable institutional agility, efficiency, and innovation.  
https://events.educause.edu/annual-conference/2023/agenda/cloud-computing-community-group-meeting | • Niranjan Davray - University of California San Diego  
• Damian Doyle - UMBC  
• Community members | CCCG                                                      |
| 9/27/2023  | CCCG Monthly Call - Supporting Researchers in the Commercial Cloud     | This month’s meeting will be a joint meeting between the Cloud Computing Community Group and Research and Data Community Group. Both communities will join the call to learn about supporting researchers in the commercial cloud. We have 3 panelists lined up to discuss their experiences, challenges, and success in assisting researchers using the cloud for their research. Community members will have a chance to ask questions or share their experiences as well. | • Cyd Burrows-Schilling - University of California San Diego  
• Brian Pasquini, University of Pittsburgh  
• Circe Tsui, Emory University | CCCG                                                      |
| 8/23/2023  | CCCG Monthly Call - End-of-Summer/Back-to-School Open Discussion       | This month’s Cloud Computing Community Group will be an open discussion session. As we begin to welcome students back to campus and wrap up our summer projects, let’s hold an open discussion session. Talk about exciting projects you did over the summer with cloud computing, what’s on the horizon for the fall semester, and anything interesting with cloud computing you want to speak about. Bring your challenges and your problems, well, only your cloud problems. Most importantly, be there and ready to talk. Our co-chairs will be there to help coordinate the discussions, take notes, and keep the conversations flowing. | | CCCG                                                      |
| 7/26/2023  | CCCG Monthly Call - Automated Transcription for Social Science Researchers | Social science researchers frequently need audio recordings transcribed for analysis. However, third-party software and services often present both technical and security challenges. In this session a team from Indiana University will discuss the motivation and the technical implementation of the Automated Transcription Service (ATS). This simple and 100% serverless solution leverages cloud machine learning (ML) APIs and other cloud services to provide convenient and secure transcription capabilities for social scientists. | • Prof. Emily Meanwell, IU  
• Philip Berg, IU  
• Alan Walsh, IU | CCCG                                                      |
Contrary to on premiise infrastructure, one cannot simply 'set it and forget it’ in the cloud as resources are billed by the hour (or minute!). Out of this paradigm, came a new specialty for IT folks – FinOps (Cloud Financial Management). This month we have wonderful speakers featured at Cloud Forum 2023 presenting on their experience developing and managing FinOps. The number one cloud comment I get from Executives, "I hear everything is much more expensive in the cloud". My response, "Not if managed correctly". Please join us to learn FinOps tips and tricks from renowned higher ed experts.

- Maggie Spangenberg "Developing FinOps at UT Austin"
  UT Austin will share their FinOps journey from initial cloud exploration to exponential growth. UT’s processes needed to evolve as cloud spend went from nothing to over $1M annually. UT is planning to show dashboard visualizations that allow departments across campus to see their current spend, cost optimization opportunities, and usage data. There are also internal processes for tagging cloud resources and billing back to departments for recovering spend.

- Jonathan White "Tag, You’re It!"
  Has someone asked you what your university is spending in the cloud? If not, they will. One of the first steps to answering this question is tagging your cloud resources. UCF recently finished a major infrastructure tagging project and this presentation will highlight the steps we took to implement tagging across Azure, AWS, and eventually, Google Cloud. Using documentation from these cloud providers, we developed a multi-step project plan around discovery, design, remediation, and governance. We will share this plan, best practices, lessons learned, pain points, and provide step-by-step guidance so that you’ll be ready to implement tagging at your university.

SkyPilot Webinar
SkyPilot is an open-source framework from UC Berkeley that enables users to run Machine Learning and Data Science batch jobs seamlessly on any cloud, reduce cloud costs substantially, tap into best-in-class hardware on different clouds, and enjoy higher resource availability. In the webinar, we will introduce the concept of SkyPilot and show demos of how to easily launch jobs on any cloud with SkyPilot.

- Rob Fatland, University of Washington
- Zhanghao Wu, UC Berkeley

This month will feature panelists from our community that have used cloud for teaching and learning. Some have taught cloud in the classrooms, while others have supported faculty in using cloud in their courses. Our panelists will share their experiences, what has worked, what didn’t, tips, and tools/services from our partners such as AWS, Azure, and Google to assist with teaching and learning.

- When: 9am PT/12pm ET
- Where: https://internet2.zoom.us/j/91519802344

UT is planning to show dashboard visualizations that allow departments across campus to see their current spend, cost optimization opportunities, and usage data. There are also internal processes for tagging cloud resources and billing back to departments for recovering spend.

Moving Faster With the Cloud Everywhere

Moving applications to the public cloud can be daunting. There are years of organic growth that need to be unwound, staff to train, project plans to write, and new architectures to design. To ease the pain William & Mary chose to adopt cloud concepts and best practices in our on-premise operations before any significant migrations. In this presentation, we’ll talk about what changes we made, how they prepared us for cloud migrations, and how it continues to make hybrid operations easier (because we still have a network on-campus to run). We’ll close with a brief case study of how the single mode of operation made moving our student information system to the cloud trivial and nearly transparent to our users.

- When: 10:30 am PDT / 1:30 pm EDT (duration 1 hour)

Maggie Spangenberg, The University of Texas at Austin
Phil Fenstermacher, William & Mary
In 2021 Internet2 NET+ Infrastructure & Platform Services program manager Bob Flynn put out a call to the community to identify the greatest areas of need for tooling to help them run the major cloud platforms at scale at their institutions. That call included a survey and that survey resulted in our 2022 exploration and ultimate agreement to create a higher ed Kion program. This year we are moving down the list of survey results to revisit RONIN. Please join us for a fresh look at RONIN and help us assess community interest in a NET+ RONIN agreement.

~~~~~~~~~~~~~~~~~~~~

**Description:** Researchers venturing more and more into using cloud computing and commercial cloud vendors. Many of them do not have experience with system administration or managing cloud services. This can present a challenge to groups who do not have the capacity to hire a cloud specialist to manage infrastructure for them and may lead to less utilization of cloud services.

Over the last few years, the Advanced Research Computing (ARC) team at the University of British Columbia (UBC) has explored various cloud platforms and solutions to help UBC researchers harness the power of the public cloud and enhance their computing capabilities.

Our journey with RONIN started in January 2020 with an in-person demo of the RONIN platform. We transitioned our successful RONIN Platform pilot to being the first University in North America to use RONIN as a full-service cloud offering to the UBC research community.

We will briefly discuss what ARC is and our role at UBC. Our researcher community and the challenges faced with public cloud using the user interfaces on current cloud providers. We will share our experience with RONIN and demonstrate a live demo of what a researcher just starting out will experience on RONIN and what it takes to set up their workflow in a cloud environment.

<td>2/22/2023</td>
<td>CCCG Monthly Call - Enhancing Public Health Infectious Disease Genomics through Cloud Computing</td>
<td>Infectious disease genomics is a rapidly changing field within public health. The increased need for genetic characterization during the SARS-CoV-2 pandemic combined with newly emerging sequencing technologies has led to a wide adoption and application of sequencing approaches across public health laboratories. This in turn has created a need for computer environments that can handle complex bioinformatics workflows and scale to meet a growing need. The Wisconsin State Laboratory of Hygiene (WSLH) has adopted a cloud-based approach that leverages AWS services to build a highly reliable infrastructure that is both cost effective and highly scalable. When combined with Nextflow pipelines utilizing Docker containers, the result is a highly reproducible production analysis environment that is capable of supporting a variety of public health goals including infectious disease surveillance and outbreak investigations.</td>

<tr>
<td>2/6/2023</td>
<td>CCCG Special Presentation: RNP Presentation on MultiCloud &amp; DevSecOps</td>
<td>The CCCG will be hosting a special presentation on Monday, February 6th, 2023, 9am PST / 12pm EST. Rede Nacional de Ensino e Pesquisa (RNP) is the Brazilian national research and education network (NREN), roughly equivalent to the role Internet2 plays in the US. Not only do they provide secure and high-capacity internet, but they do targeted development services and support innovative projects to further the social good. Their system includes universities, educational and cultural institutes, research agencies, teaching hospitals, parks and technology centers. With this, they benefit 4 million Brazilian students, teachers, and researchers. Seven years ago, when RNP started to work with public cloud, they had a very traditional dev team. Their applications ran on premises and they had very little automation in their development processes. They started to lift &amp; shift systems to the cloud but they did not feel they were really reaping the benefits of the public cloud or of DevSecOps practices. They found it difficult to become a “Cloud Native / DevSecOps” Organization. It took 4 years and an iterative process to transform themselves into a cloud-savvy, DevSecOps-practicing, actively-learning organization. They would like to share their journey, how they operate now, and the impact these changes have had on their work. In addition to the lessons learned along the way, they will discuss the tools they have developed to support their work and use cases they have applied them to.</td>
<td>• Sergio Leal, Head of Solutions Architecture (RNP)</td>
<td><img src="slides.png" alt="CCCG Slides" /></td>
</tr>
<tr>
<td>1/25/2023</td>
<td>CCCG Monthly Call - Getting started with the cloud (Best Practices)</td>
<td>Hear stories from our panelists on getting started in the cloud. Panelists will discuss their cloud journey, lessons learned, what they would do if they had to do it again, and offer some guidance for our community. Afterwards, we will discuss the formation of a Cloud Best Practices Working Group and will seek volunteers from our community.</td>
<td>• Rick Rhodeas (Penn State University) • Shelley Rossell (Univ of Chicago) • Bill Thompson (Lafayette) • Kevin Willey (Bucknell University)</td>

• Kari Robertson                                                                                   |
| 19 Oct 2022 | Key Considerations          | Researchers are increasingly leveraging computational technologies as a key approach within their research. More and more disciplines are leveraging data, simulation, and advanced analytics to perform their research. Researchers have increasingly complex requirements and expectations as they join institutions and funding agencies are requiring new and more complex data retention approaches. At the institutional level, developing a strategy on how to support the wide range of requirements in a supportable, cost effective, and secure way has become a critical strategic initiative. This session will discuss a perspective on how to support researchers, impacts from the funding agencies and AWS technology solutions.  
• Audience: This session is for higher education information technologists, VPs of Research and principal investigators interested in using cloud to accelerate and scale their scholarship.  
• Time: Wednesday, October 19 at 11 am PDT/2 pm EDT | • Rick Friedman – Head, US EDU Research Strategy and BusinessDevelopment team, Amazon Web Services |

<td>18 Oct 2022</td>
<td>NET+ Kion Service Evaluation and Release</td>
<td>Back in January of this year Internet2 hosted a webinar for Kion (formerly cloudtamer) in response to community demand for a multi-platform cloud enablement tool. The webinar and buzz it generated led to a NET+ service evaluation and now a higher education agreement. A dozen schools participated in the Kion service evaluation. The community members who led the working groups would like to share their work and findings with you. Please join us to better understand the accessibility, business, functional, identity, and security reviews conducted during the past four months to vet Kion’s suitability for meeting the needs, and adhering to the practices, of the research and education community’s cloud operations. For more read the blog post: Kion Checks the Top Boxes</td>
<td>Bob Flynn - Internet2, Tara Gyenis - Internet2, Todd Haddaway - UMBC, Brad Herold - Kion, Jeff Minelli - PSU, Rick Rhoades - PSU, Shelley Rossell - Chicago, Randy Shore - Kion</td>
</tr>
<tr>
<td>9/28/2022</td>
<td>CCCG Monthly Call - Revisiting our failures</td>
<td>Discussing how we faltered, then picked ourselves up, dusted ourselves off and came back better than ever! NOTE: No Zoom recording so attendees can feel safe to have open discussions.</td>
<td>Facilitated by Damian Doyle</td>
</tr>
<tr>
<td>8/24/22</td>
<td>CCCG Monthly Call - Cloud Standards Panel</td>
<td>Panelists discuss the following questions followed by Q&amp;A with the larger group:</td>
<td>Matt Stout, University of California, Ben Rota, Harvard University, Wes Emerson, University of North Carolina, Lucrecia Kim-Boswell, Stanford, Laura Hugill Belken, Mayo Clinic</td>
</tr>
<tr>
<td>7/27/22</td>
<td>CCCG Monthly Call - Sharing Stanford’s best practices for building out centralized GCP offering</td>
<td>How do you enable researchers or data analysts across disparate schools or agencies to take advantage of GCP, while providing central oversight, budgeting and governance? See how Stanford addressed this challenge, after various schools across the university started using GCP independently and requested help from Central IT to get billing and oversight under control. Lucrecia Kim-Boswell, IT Director of Stanford University, will walk through the best practice structure their partner setup to manage billing and operations, so that an entire campus can easily access GCP with the help from a small University IT Team.</td>
<td>Lucrecia Kim-Boswell, Stanford</td>
</tr>
<tr>
<td>6/22/22</td>
<td>CCCG Monthly Call - Open Discussion</td>
<td>This month’s open mic discussion started with some questions EDUCAUSE asked the CG’s to post to the community. Those questions, and some of the responses, can be found in the running notes. There was then some discussion about the role of EDUCAUSE in the past and how that has changed and brief mention of Internet2’s role supporting the community. Suggestions were made on additional ways to get engaged in the community.</td>
<td>Damian Doyle, UMBC, James Monek, Lehigh University, Kari Robertson, University of California</td>
</tr>
<tr>
<td>5/25/22</td>
<td>CCCG Monthly Call - Secure research enclaves and compliance</td>
<td>This month is all about security and compliance. All of us are responsible for security but bring your security team along today for the presentations and conversations. First will be a presentation from John Bailey at Wash U discussing How to Create Secure Research Enclaves and everything involved in that. James Monek from Lehigh University will also be giving an update on the Health Data Warehouse Pilot he previously discussed, since it has now finished a HIPAA audit and he can discuss how that went.</td>

2/23/22  CCCG Monthly Call - Internet2 Cloud Networking Tools and open Discussion  
Asks: Invite your networking colleagues to the meeting for the presentation/discussion. Put some networking questions/topics in the agenda for the open discussion portion following the presentation.

Guest Presenters: We are going to have Internet 2 discuss some plans and ideas they have for how to better allow cloud administrators/architects/etc to be able to manage/adjust/leverage the advanced Internet 2 network features and connections, as well as some opportunities to provide some input into the user design and shaping of these initiatives.

We will also have time for some open discussion, and I’d like to encourage folks to bring along one of their network colleagues if they are available to help us have a broader, well informed discussion since both the I2 presentation and the open discussion will benefit from everyone different perspective.

1/26/22  CCCG Monthly Call – “IT’S A PILOT! Legitimatin experiment al work in your cloud”  
Has this happened to you? You have a cloud that’s not ready to take payments, or not ready to be used by the masses, or you don’t know how to do things right — but something comes through that you shouldn’t say no to. UChicago has handled these situations with a lightweight pilot framework. Both the cloud people and the user agree in advance, in writing, on what both parties will get from the situation. It has helped to set expectations about the unexpected and ultimately get unstuck.

The 2nd part of Wednesday’s meeting be open discussion (so put those topics in the running agenda or bring them with you Wednesday). We look forward to seeing everyone, and I’ve included all the meeting info below again as a reminder.

- When: 9am PT/12pm ET  
- Where: https://internet2.zoom.us/j/91519802344

1/11/22  Internet2 Infrastructure & Platform Services Search for Good Tooling – Kion.io

Last summer Internet2 NET+ Infrastructure & Platform Services program manager Bob Flynn put out a call to the community to identify the greatest areas of need for tooling to help them run the major cloud platforms at scale at their institutions. That call included a survey and that survey produced some decent results.

In a three-way tie for the top survey response were:

1. Account automation and maintenance  
2. Security monitoring and remediation  
3. Cost tracking management and savings.

The solutions had to be multi-cloud and pass muster with institutional security and compliance. One tool that was specifically suggested by multiple respondents in these areas was cloudtamer.io.

Cloudtamer.io has since changed its name to Kion, but we are still interested to see if their tools will meet these needs. It appears to tick all those boxes from the survey, but will it work for higher ed? Join us to find out.

| 12/8/21  | Special Edition Monthly Call - The Big Lie: Cloud Computing - Bill Wrobleski, Penn State | 12:00pm ET - 12:45pm ET  
In 2011, I started evangelizing for the Cloud. It’s been 10 years, so the future I promoted has come true, right? I’ll revisit the vision we imagined, what actually happened, and explore the question “Is cloud computing the biggest disappointment for higher education this century?”  
EDUCAUSE 2021 and Cloud Forum 2021 Wrap-ups. What are we planning for 2022?  
12:45pm ET - 1:00pm ET  
Co-chairs will provide a brief wrap up of the recent conferences and feedback we received for what the CG should be focusing on in 2022. And yes, we want your feedback before you leave for the holidays, so there will be homework. | Bill Wrobleski, Penn State

| 11/18  | Live from Cloud Forum 21 - Presentations                            | Cost is always a concern when moving from the traditional capex model on prem to the opex model in the cloud. Declan Fleming and Jessica Respicio from UC San Diego will share what they learned about cost (and business) optimization from their experience with cloud at UCSD and CloudBank. In our final presentation, Penn State’s Rick Rhoades will share how pandemic hiring challenges and an innovative talent-sharing program led to surprising success and unexpected outcomes. See the Cloud Forum Agenda for descriptions, slides and recordings. | • Declan Fleming - UC San Diego  
• Jessica Respicio - UC San Diego  
• Rick Rhoades - Penn State University |
| 11/18  | Live from Cloud Forum 21 - Researcher (Amazon)                      | Researcher presentations are a highlight for Cloud Forum attendees each year. The researchers are asked to focus on their research, not the underlying cloud technology, though that does sometimes poke through. These talks are meant to remind us cloud professionals of the importance of the work we do each day. This year’s researcher nominated by Amazon is Professor Eric Venner, Associate Professor, Division Director for Bioinformatics from the Human Genome Sequencing Center – Clinical Lab at the Baylor College of Medicine with a talk titled “Implementing Genomic Medicine at the HGSC.” | • Eric Venner, Associate Professor, Division Director for Bioinformatics from the Human Genome Sequencing Center – Clinical Lab at the Baylor College of Medicine |
| 11/17  | Live from Cloud Forum 21 - Researcher (Microsoft)                   | Researcher presentations are a highlight for Cloud Forum attendees each year. The researchers are asked to focus on their research, not the underlying cloud technology, though that does sometimes poke through. These talks are meant to remind us cloud professionals of the importance of the work we do each day. This year’s researcher nominated by Microsoft is Dr. Travis Osterman of Vanderbilt University Medical Center with a talk titled “Lessons Learned from VUMC’s First End-to-End Cloud Project.” | • Dr. Travis Osterman of Vanderbilt University Medical Center |
| 11/17  | Live from Cloud Forum 21 - Presentations                            | The maintenance and lifecycle of data is a never-ending challenge. In our first presentation we’ll hear about research into how schools are dealing with the seeming end to unlimited cloud storage being done by Internet2’s Oren Sreebnny. Oren will be joined by Helen Hockx-Yu who will share how Notre Dame is approaching the problem. In our second presentation, Ken Bigelow and Venkat Mahadevan from the University of British Columbia will explain their efforts to make use of cloud computing easier for their research community. See the Cloud Forum Agenda for descriptions, slides and recordings. | • Oren Sreebnny - Internet2  
• Helen Hockx-Yu - Notre Dame  
• Ken Bigelow - University of British Columbia  
• Venkat Mahadevan - University of British Columbia |
| 11/16  | Live from Cloud Forum 21 - Researcher (Google)                      | Researcher presentations are a highlight for Cloud Forum attendees each year. The researchers are asked to focus on their research, not the underlying cloud technology, though that does sometimes poke through. These talks are meant to remind us cloud professionals of the importance of the work we do each day. This year’s researcher nominated by Google is Luigi Marchionni, Associate Professor of Pathology at Weil-Cornell Medicine. Professor Marchionni’s talk is titled “A Hitchhiker’s Guide to Big Data Based Biomarkers.” | • Luigi Marchionni - Associate Professor of Pathology at Weil-Cornell Medicine |
| 11/16  | Live from Cloud Forum 21 - Lightning Talks                          | The first day of the 2021 Cloud Forum’s online content kicked off with nine (9!) lightning talks from the National Institutes of Health, University of Chicago, CloudBank and Internet2. For details, slides and a recoring of the talks see, the Cloud Forum agenda. | • Philip Meacham - NIH  
• Yanik Wynter – NIH  
• Carlo Espiritu - NIH  
• Joel Peterson - NIH  
• Rob Fattal - UW, CloudBank  
• Shelley Rossell - Univ Chicago  
• Cornelia Bailey - Univ Chicago  
• Ananya Ravipati - Internet2  
• Bob Flynn - Internet2 |
| 10/29  | EDUCAUSE 2021 Face to Face meeting                                  | Join this discussion on the challenges and opportunities associated with cloud computing. Topics will include contract negotiations, vendor relationship management, compliance and legal issues, data privacy and security considerations, identity and access management, service integration, skills and staffing implications, and cloud use cases that enable institutional agility, efficiency, and innovation. | • Jody Couch, UC Berkeley  
• Damian Doyle, UMBC  
• James Monek, Lehigh University

9/22/21  Cloud FinOps

Cloud costs keeping you up at night? Are you wondering how to keep costs from running out of control? What practices should you put in place now to stay on top of the cloud spending game?

A group of higher education cloud professionals with expertise in cost optimization and cloud financial best practices met regularly through the spring and summer pooling their expertise in an effort to create a list of tips and techniques for making the most of your cloud dollars.

In this session they shared those pearls of wisdom with you, their colleagues in higher ed cloud.

Find their slides, full tip sheet, presentation recording and more on the session resource page.

8/26/21  Special Edition of Monthly CCCG Call

We are excited to announce that for this month’s call, the Research Computing and Data CG will be partnering with the Cloud CG! The call will be held on Thursday, August 26th from 1-2 pm ET. In this call, we will discuss top use cases for cloud for research.

We will first hear from you on what your top use cases are, and what services you are keeping on-premise. We will then explore how to manage distributed costs associated with cloud usage. We will discuss models and resources used to support researchers using the cloud, as well as the level of support provided at different institutions.

Please download and import the following iCalendar (.ics) files to your calendar system. Monthly: https://educause.zoom.us/meeting/3jrJkd-oqtTsGNEiXHMKLyvD6yYJuG03iBR ics Token=-98tyKuCqpsseGtOViBuCRowcHYiaM_TwtrnJbY14mflNLqt_eX1EeRbCSHqN4iD

7/28/21  NET+ GCP Summer Camp: Running the Institution on Cloud Power

IT professionals are always looking for the best tools for the job. An ever-increasing number of those jobs can be done more efficiently or effectively with cloud tools. In the final NET+ GCP Summer Camp session of 2021 we will hear about a range of uses, from the operational, to the strategic, to the meta.

- Cloud enablement automation
- VMWare in GCP Proof of Concept
- GCP and the Unizin Data Platform for Learning Analytics

Maneeah Aggarwal & Parinit Dave, Columbia University
John Bailey, Washington University in St. Louis
David Reed, University of Missouri

Whether you are multi-cloud or focusing your efforts on one, support tooling for cost and security tracking are increasing helpful and increasingly important. CloudCheckr provides cost management, asset inventory, security & compliance monitoring, and resource utilization tracking across your multi-cloud environments, giving not only centralized visibility into your cloud at the enterprise level, but also putting tools in the hands of individual researchers, departments and developers.

See CloudCheckr in action and hear what your peers who evaluated the service think about it.

On the afternoons (1-5 EDT) of June 2-4, the Higher-Ed DevOps Conference will be meeting to share training, best practices, and more. If you are faculty/staff of any InCommon institution, you are welcome to join us… for free!

Check out the agenda.

20 schools collaborate with Internet2 to vet and release four new NET+ services to the community.

- CloudCheckr
- Google Workspace of Education
- Palo Alto Networks
- signNow and airSlate

University of California migrates PeopleSoft HR to AWS

University of creates powerful COVID-19 testing tracking tooling under constantly changing guidelines

The case for avoiding “networking” in your cloud adoption strategy.

| 10/9/20    | Cloud Community Governance                       | • Bringing order to wild free range cloud through inclusive governance  
• Panel: Leveraging the Cloud Community | Damian Doyle and Todd Haddaway – University of Maryland Baltimore County  
Oren Sreebny – Internet2 – Moderator; John Bailey – Washington University in St. Louis; Bob Flynn – Indiana University; Matthew Rich – Northwestern University; Alok Vimawala – University of Michigan |
| 9/23/20    | Open Discussion                                  | Lots of community announcements. A pitch for people to join the DevSecOps conversation. Brief mention of the FinOps discussion. What role is cloud playing in back to school and COVID-related work, including storage of testing/tracing data. Short rant about Box security. Discussion of how schools are taking requests for cloud accounts and how they keep track of inventory and what people are doing in their accounts. Lessons and resources shared. | James Smith & Brandon Rich – University of Notre Dame |
| 9/11/20    | Cloud Enablement Success Stories                 | • Working with Cloud reserved instances to reduce costs  
• Monitor AWS with Grafana 7  
• Cloud Billing  
• OTICA – Platform-on-a-Platform for GCP  
• UCF’s Remote Learning Solution to the Pandemic  
• Notre Dame’s Accelerated VDI Madness | Gerard Shockley – Boston University  
James Morek – LaHigh University  
Jim Charters – University of Michigan  
Hans Jacobsen & Alan Ge – Stanford Healthcare  
Jeff Samek, Robert Connors & Bob Mello – University of Central Florida  
James Smith & Brandon Rich – University of Notre Dame |

| 8/5/20     | Q&A with IU Box Migration team                         | As a number of schools review their storage and collaboration strategies, Indiana University can provide insights from its experience. Indiana University was the first high-profile higher education customer to announce it was moving to Microsoft and Google and away from Box. IU's early start resulted in many schools looking to learn from their research, successes and failures. IU has received several inquiries from other higher ed schools and is offering to discuss its experience and considerations. As a result, the IU Box migration team put on an infoshare in June covering their process, communications, technical decisions and lessons. The recording of that infoshare, as well as slides and detailed communication plan, can be found at [https://drive.google.com/drive/folders/1zZ5YnND9IO-MFrZeZxsMU4bdq9d6aBw5S?usp=sharing](https://drive.google.com/drive/folders/1zZ5YnND9IO-MFrZeZxsMU4bdq9d6aBw5S?usp=sharing). It's one thing to listen to the story, it's another to chat with the story tellers. In the wake of the infoshare the calls for meetings with the migration team have continued to come. In order to allow this hardworking team to focus on their hard work, we have arranged a dedicated Q&A session for any and all to bring their questions about tools and timing, dependencies and decisions, method and messaging, and so much more. NOTE: We learned our lesson last time and we have a larger-capacity Zoom roof for this call. | • Adam Sweeney - Indiana University  
• Justin Zemlyak - Indiana University |
| 7/23/20    | Higher Ed Cloud Networking & Security Workshop - Workshop Capstone: Peer Architectures | Presentations from three peer institutions, each presenting their architectures and best practices on one of the three platforms.  
Panel discussion, Q & A, Workshop wrap                                                                 | • Ken Hoover – Yales University  
• Jason Sullivan – University of Arizona  
• Alok Vimawala – University of Michigan |
<p>| 7/22/20    | Open Topic Discussion with a twist | Many in the community are taking part in the Higher Ed Cloud Networking &amp; Security Workshop series. At the start of that series, attendees brainstormed a number of questions for the cloud vendors. Among those questions were many that were better suited as a discussion between members of the community. July would normally be an open topic discussion. We are keeping with that in spirit, but we are going to seed the conversation with a selection of questions from the list. |                                                                                                   |
| 7/9/20     | Higher Ed Cloud Networking &amp; Security Workshop - Google Responses to Workshop Attendee Questions &amp; Challenges | This session of the Cloud Networking and Security workshops features Google's team answering the questions and challenges compiled by community participants during the May 28 session. |                                                                                                   |
| 6/25/20    | Higher Ed Cloud Networking &amp; Security Workshop - Amazon Responses to Workshop Attendee Questions &amp; Challenges | This session of the Cloud Networking and Security workshops features Amazon's team answering the questions and challenges compiled by community participants during the May 28 session. |                                                                                                   |</p>

<td>Switching cloud storage platforms can be challenging, especially when petabytes of data are involved. Indiana University has begun the process of switching from Box to Microsoft and Google for end-user cloud storage and is looking to share its experience and learn from the community. Topics will include IU's motivations for a move, selecting a migration vendor, when to leave the legacy storage up or take it down during a migration, how to handle loss of features when changing platforms, what communications challenges universities will face, and how COVID19 complicates a storage migration.</td>

| 2/26/20    | Open Topic Discussion                                                      | • A lot has happened in the HED cloud world since our last open discussion. Add your topics to https://tinyurl.com/EDUCAUSE-CCCG.  
• Topics covered:  
  ◦ Community event updates  
  ◦ RFPs for hosting ERP in the cloud  
  ◦ How to address negative attitudes about using public cloud  
  ◦ What are you doing to bring public cloud to the classroom?  
  ◦ Cloud-based VDI experiences | CCCG Running Notes                                                    |
| 1/22/20    | Data-driven Cloud Planning                                                  | • **Topic 1:** Whether Forecasting: Informing Migration Choices with Metrics  
  ◦ **Description:** Migration of applications to the Cloud is now a foregone conclusion for many institutions in Higher Ed. The first applications to leave the ground may be obvious or pre-determined, but after that initial rush of success of the few, what can be used to inform the bulk of the daunting effort that remains? Faced with a commitment to migrate 40% of the workload of over 400 applications within a 12 month period, UCLA developed a metrics based scoring and benefits spreadsheet tool to help inform and support the prioritization of application migrations. This presentation explains those metrics, the controls for scoring, and demonstrates the functioning of the tool.  
• **Topic 2:** From Operational to Predictive: Evolving from a Traditional Data Warehouse to an Analytics Hub  
  ◦ **Description:** In 2018, UMBC embarked on creating a new analytics-focused data warehouse with highly-performant real-time data ingestion pipelines using primarily native AWS tools. This session will outline the progress made leveraging AWS tools as well as open sourced products to establish the event-based ecosystem. We hope these methods can be used as a model for other campuses, as well as highlight the long-term benefits of re-architecting critical systems and processes in the cloud to accelerate innovation. | Brendan Bellina, Lead IT Architect, UCLA IT Services, Systems Services |
| 12/14/2022 | CCCG Nov/Dec Meeting                                                        | • James Monek

- **2019**  
  ◦ December 16 (combined Nov/Dec event) - Fall Cloud Conference Round-Up  
    ▪ Cornell Cloud Forum  
    ▪ Microsoft Ignite  
    ▪ AWS re:Invent  
    ▪ Internet2 Technology Exchange  
    ▪ Notes, recording and links  
  ◦ October 23 - Federated Access to Research Data  
    ▪ Dr. Craig A. Lee, Chair, NIST Public Working Group on Federated Cloud (lee@aero.org)  
    ▪ Khall Yazdi, Chair, Open Research Cloud Alliance (khalliyazdi@outlook.com)  
    ▪ Slides, notes and recording  
  ◦ EDUCAUSE 2019 Face to Face meeting (Chicago, October 16, 2019)  
    ▪ Slides, notes and photo  
  ◦ September 25 - Open Discussion  
    ▪ Early survey results  
    ▪ EDUCAUSE F2F  
    ▪ CCCG Leadership transition  
  ◦ August 28 - Supporting Research in the Cloud - Round 1: The Human Bridge  
    ▪ Derek Morr (Cloud Solutions Architect) and Greg Madden (Associate CIO for Research) - Penn State University
July 24 - Open Discussion
- Funding for OS teams in the cloud
- AWS Multi-Tenant vs Multi Account Strategy
- Creating and tracking a 'cloud innovation' fund through optimization
- How are you supporting researchers in the cloud?
- Integration Tools

June 26 - Cloud Community Events and Activity
- Recap of Cloud Networking Workshop put on by U Michigan, U Minnesota and Internet2 (Alok Vimawala - UMich)
- Update on Cornell Cloud Forum 2019 (Sarah Christen - Cornell)
- CCCG Engagement Channels (Bob Flynn - IU)
- CCCG Engagement Team (Jody Couch - UCSC)

May 22 - Open Discussion
- Announcements
- Cloud Forum dates: November 6-8, 2019
- Reminder: CFP for 2019 Cornell Cloud Forum closes June 1
- #cloud_jobs channel added to CCCG Slack Team - post your cloud jobs there!

April 24 - Google Cloud Platform
- Evolution of GCP at an Office 365 University – presentation by John Bailey, WUSTL
- With Great Integration Comes Great Responsibility (a.k.a. GCP at a G Suite School) – presentation by Bob Flynn, IU
- Google CAB GCP Track
- News from Google Cloud Next
- Tech bulletin: Don’t fear the mystery folder. Unexpected visitor due to Google change

Mar 27 - Open Discussion
- Performance testing of moving data from one cloud provider to another
- SSO with AWS and how to federate external users
- Upcoming AWS webinar series
- Options for handling cloud training needs
- Call for (self-)nominations for CCCG co-chairs

Feb 27 - Open Discussion

Jan 23 - Cloud Q & A for Small Schools

Dec 5 - Excerpts from the 2018 Cornell Cloud Forum

1. Title: Ouch! Commonly Overlooked (or Surprising) Cloud Costs
   Description: “Wait … that costs how much?” How do you prepare stakeholders for cloud-related charges that were provided ‘for free’ while on-premise? What new charges exist in the Cloud? What are the associated costs? Most importantly, who is going to pay them?
   Presenters: Kari Robertson and Glenn Blackler - UC Santa Cruz

2. Title: Using AWS CLI with Shibboleth and Duo
   Description: How can higher education give our faculty and staff convenient access to AWS tools without leaving behind a mess of long-lived secret keys? We’ll demonstrate a University of Illinois plugin to the AWS CLI which authenticates against Shibboleth with Duo and manages short-lived credentials, making it easy to be secure.
   Presenter: Chris Kuehn - University of Illinois

3. Title: Kubernetes: Container Orchestration at Scale
   Description: Kubernetes is a resource scheduler that started as a Google project. Now it is the primary container scheduler being adopted across the spectrum of both cloud and on-prem based deployments. With an extensible scale-first architecture it’s easy to see why its adoption has outpaced other solutions such as Docker Swarm and Mesos. The goal is to present on the architecture of Kubernetes and basics of running Kubernetes at scale.
   Presenter: Jeff Sica - University of Michigan

Resources: “Introduction to Kubernetes” open-source eight-hour 100-level labs: https://goo.gl/uHq6T4 and presentation: https://goo.gl/yb6Hfr

4. Time Permitting: AWS re:Invent recap

Nov 1 - Open discussion at in-person meeting at EDUCAUSE Annual Meeting

Oct 24 - Open discussion (see notes)

Sep 26 - Funding models for new cloud paradigms (speakers: David Seidl- Notre Dame, Ben Rota - Harvard)

Aug 22 - Notre Dame and the Cloud - Over the past three years, Notre Dame University has moved more than 80% of their IT infrastructure and services to Amazon Web Services (AWS). On this month’s Higher Education Cloud Collaboration conference call, leaders from Notre Dame University will provide an overview of their move to AWS, and will share their lessons learned and advice for other institutions.

Limit of recorded history
