InCommon Wayfinder (Wayfinder) helps users easily find and remember which school or organization they want to sign in with. When a user tries to access a Wayfinder-connected service, it redirects the user to a page where they can pick their school or organization from a list. They can also choose to remember their choice for next time.

Wayfinder is InCommon’s official home organization discovery experience designed to streamlines a user’s journey to locate and remember their preferred home institution when accessing federated research and education resources.

Key Features:

- Intuitive Interface: Seamlessly navigate through the authentication journey with an intuitive, user-friendly, and accessible interface.
- Personalized Discovery: Easily locate and remember preferred institutions during sign-in for added convenience.
