## 4.2 Additional comments

**UMUC** We use PeopleSoft SAIP and Integration Broker/Web Services to expose changes in course enrollment in real time. We do not integrate directly with PS, but use an ESB to mediate and orchestrate to downstream systems.

### UofT

We have implemented IBM's WebSphere Message Broker (WMB) and WebSphere Services Registry and Repository (WSRR).

### UM-W

There are nacent pockets of development with the PeopleSoft Integration Broker
