InC-Student Services Group

InCommon Student Services Group

This is the development space of the InCommon Student Services group, a collaboration of IT Staff and Registrar campus teams, AACRAO, EDUCAUSE and Internet2. Through the development of education and discussion material and related projects, the goal is to encourage others to explore using federation and other trust infrastructure services to improve processes in the areas of admissions, registration, enrollment verification, transcripts, and other aspects of student administration and student experience.

For more information, contact Ann West at awest AT internet2 DOT edu.
