Blog posts - planning ahead. One possible topic would be EDM

- More Advanced: Case Studies of actual practice, what parts were useful, what was problematic, how did you get buy-in
- Topics: TOGAF, Zachman, Archimate
- Training and Certification, Modeling Languages, Tools, Templates and Artifacts at the Application Architecture Level, Practices Policies and Procedures that help make it concrete,
- Architecture Patterns: SOA, EDM
- Outreach to Business Partners - Partners you should be working with or partnerships you should be trying to create

Panel Discussion: EA WG - ITANA on your campus as a way of getting buy-in

Face2Face 2012 Planning

- Like the ability to network with people. Break down into the newbie, been doing it a while, longtimers then remix the folks
- Pool the groups earlier - self-identify early on
 - JISC (rough) description of EA maturity:
 - Explorer: researching, investigating EA, identifying potential change projects, developing a case
 - Adopter: planning, orienting, engaging with colleagues, designing a live project
 - Implementer: initial project under way, with training and support
 - Achiever: First results, impact and value evident - may be hard to quantify at this stage
 - Practitioner: EA is an established professional approach for strategic change and development
- Instructor-led training for the EA 101 portion first thing, then all together later on (can we get multiple rooms for the day for break out sessions?)
- Case Studies

Other meetings we should present at: e.g. AACRAO
