Grouper School Workshop Series: Access Governance with Grouper and Friends

Access governance with Grouper and friends is a two-day workshop with a mix of lecture, hands-on training, and discussion. Participants will be guided through a series of condensed and accelerated learning modules. The modules start with Grouper basics and progress through new Grouper features, access governance, Grouper security model, and Grouper administration. The session culminates in with an access governance practicum that incorporates the InCommon Trusted Access Platform suite of components and provides a "full IAM stack" experience.

The target audience is anyone interested in implementing access governance the "InCommon way", and includes novices and folks who already have some Grouper experience.

Knowledge of identity management concepts and related implementation experience is strongly recommended.
