Reporting Grouper Security Issues

Report a Grouper security issue by sending an email message to: grouper-core@internet2.edu which will go to Grouper developers and is private.

We ask that you do not discuss security issues publicly on the Grouper mailing lists, or anywhere else, until the developers have responded to you about this and published a security notification.

You could also discuss a security issue via direct message (not on incommon-grouper) with Chris Hyzer.

To subscribe to a low-traffic list to receive news and announcements about Grouper, INCLUDING SECURITY NOTIFICATIONS, go to <https://lists.internet2.edu/sympa/subscribe/grouper-announce>
