

ESB Integration - Rob Hebron

About Me

I'm a developer specialising in Identity Management in the UK Academic community. I currently work at the Oxford University Computer Service. Amongst others, I have also worked for Cardiff University. Contributions I make to the Grouper project have been part-funded by Cardiff University (who had the initial requirements, and use the product of my efforts), and the remainder by myself (to ensure that things remain generally useful rather than domain-specific).

I've contributed the ESB connector, and am currently working on Documentation and quickstarts
