

# InCommon Trusted Access Platform Release

## Docker Containers

These Docker containers simplify the installation and configuration of the software. They are pre-configured to work well with the InCommon Federation.

### Shibboleth IdP Docker Linux Container (4.0.1)

- Current release: 20201130
- Container Image Name: i2incommon/shib-idp:4.0.1\_20201130
- Notes: bump tomcat to 9.0.40
- [Container Source Code](#)

### Shibboleth IdP Config Builder Container

- Current release: 0.6
- Notes: include blank directories in generated config
- [Container Download](#)
- [Container Source Code](#)

### Shibboleth SP Linux httpd Container (3.1.0)

- Current release: 3.1.0\_04172020
- Container Image Name: tier/shibboleth\_sp:3.1.0\_04172020
- Notes: Update SP version
- [Container Source Code](#)

### Grouper Linux Container (2.5.35)

- Current release: 2.5.35
- Container Image Name: i2incommon/grouper:2.5.35
- [Container Source Code](#)
- [Release Notes](#)

### Grouper Linux Container (2.4.0)

- Current release: [2.4.0-a96-u57-w11-p12-20200324-rc1](#)
- Container Image Name: tier/grouper:2.4.0-a96-u57-w11-p12-20200324-rc1
- [Container Source Code](#)
- [Release Notes](#)

### Grouper Linux Container (2.3.0)

- Current release: 2.3.0-a109-u47-w13-p24-20190208
- Container Image Name: tier/grouper:2.3.0-a109-u47-w13-p24-20190208
- [Container Source Code](#)
- [Release Notes](#)
- [Training Videos](#)

### COmanage Registry Linux Container (3.3.1)

- Current release: 3.3.1-20201026
- Container Image Name: i2incommon/comanage-registry:3.3.1-20201026
- See also the COmanage Registry Cron image: i2incommon/comanage-registry-cron:3.3.1-20201026
- [Container Source Code](#)
- [Release Notes](#)
- [Notes on cron container for running Registry JobShell jobs](#)

### midPoint Linux Container (4.1)

- Current release: 4.1
- Container Image Name: tier/midPoint:latest
- [Container Source Code](#)
- [Release Notes](#)

 **Download the latest software here!**

The [InCommon Trusted Access Platform](#), Research and Education's solution for identity and access management, is community-built software for identity and access management, enabling single sign-on access to collaborations and the cloud.

*The Trusted Access Platform software may be used without fees, as-is, without warranty or support of any kind, and for non-commercial purposes only. For more information, see the [Apache 2.0 license](#) that governs the community software use and reuse.*
