

Campus Success Program 2018 Home

TIER Campus Success Program

The inaugural TIER (Trust and Identity in Education and Research) Campus Success Program included a diverse group of higher education institutions committed to adopting and deploying the TIER software components and helping to accelerate adoption for the rest of the trust and identity community. This year-long program concluded in October 2018.

Purpose of the TIER Campus Success Program

- accelerate local adoption of TIER components to provide the community with guidance more quickly
- assist campuses in the successful deployment of TIER-packaged components to address one or more campus need(s),
- provide lessons learned about the local challenges and solutions
- develop deployment guidance and advice for later adopters in the form of presentations, project reports, and locally produced TIER-related artifacts
- inform the TIER program about issues encountered in production implementation
- provide data for next steps regarding adoption support, technology development and the feature set.

Benefits to the Participating Campuses

Through the Campus Success Program, TIER will provide:

- targeted education and training
- access to subject-matter experts
- facilitated peer engagement with fellow adopters

Case Studies

At the completion of their proposed project, each participating campus created a case study outlining goals, outcomes, and lessons learned. A full list of the case studies [can be found here](#)

Participants and Main Interest Areas

	Shibboleth	Grouper	COmanage	midPoint
Colorado School of Mines		x		x
Colorado State	x	x	x	x
Georgia Tech		x		
Lafayette College	x			x
Oregon State				x
Rice	x	x		x
U. California-Merced	x	x		x
U. Illinois	x	x		
U. Maryland Baltimore County	x	x		x
