

federation-manager-update-idp

Log into the Federation Manager as a site admin.

From the site home page (SA Dashboard), scroll down to the "Existing Identity Providers" section.

The screenshot shows a table titled "Existing Identity Providers" with a "+ ADD New Identity Provider" button. The table has columns for "Identity Provider", "Update", "Status", "Modified Date", and "Last Published Date". One entry is visible with the ID "1, https://add.entity.attribute.test1/shibboleth", an "Update" button, a "Published" status, and a "Last Published Date" of "05/03/19".

Identity Provider	Update	Status	Modified Date	Last Published Date
1, https://add.entity.attribute.test1/shibboleth	Update	Published		05/03/19

Find your identity provider (IdP); click the IdP's entity ID to enter the View/Edit an Identity Provider page.

"View/Edit Identity Provider" is a step-by-step, multi-section form designed to guide you through the steps of registering a new identity provider in InCommon. The steps are listed on the left of the form.

The screenshot shows the "View/Edit Identity Provider" page. At the top, it displays the "EntityID: https://demo.testbed.tier.internet2.edu/idp" and "Scope: tier.internet2.edu". Below this is a yellow "Editing" button. The main content area is divided into a left sidebar and a main panel. The sidebar lists various configuration sections: "Contacts", "User Interface Elements", "Error URL", "IdP SSO Settings", "Signing/Encryption Keys", "Entity Attributes", "Metadata Export Options", "Attribute Authority", and "Review and Submit". The "Contacts" section is currently selected, and the main panel shows a table of contacts with columns for "Contact Type" and "Name". The table contains four entries: Administrative (Elenora Buttars), Security (Helena Chism), Technical (Nicholas Roy), and Administrative (Nicholas Roy). Below the table is a dropdown menu set to "Administrative" and a text input field.

Contact Type	Name
Administrative	Elenora Buttars
Security	Helena Chism
Technical	Nicholas Roy
Administrative	Nicholas Roy

NOTE: Since you cannot edit the Entity ID and Scope once your IdP has been published to the InCommon metadata, the first step, "Entity and Scope" does not appear if this IdP has been previously published to the InCommon metadata

Remember to navigate to "Review and Submit" to submit your entity for publication. Your changes won't be published to the InCommon metadata until you submit it for publication.
