NET+ Candidate Services

Selecting a service provider begins with a challenge that a campus is experiencing, or with a common need from the broader R&E community that could be solved with a cloud-based solution. The university identifies a service provider who may have a potential solution. In turn, the university decides to sponsor the particular service within the Internet2 NET+ program and introduce the service provider to the community. The steps for this are articulated in the Service Intake process. Internet2 Higher Education Members or Service Provider interested in bringing forward a service should review the intake process and contact netplus@internet2.edu with any questions or to indicate interest in participating.

The sponsored service proceeds through the process identified by the NET+ lifecycle, including thorough research and testing, and early adopter participation. Ultimately, these efforts lead to the announcement of the service for general availability to the higher education community.

Below is a listing of Candidate Services:

<table>
<thead>
<tr>
<th>Service Provider</th>
<th>Service Name</th>
<th>Intake Form Complete?</th>
<th>Status</th>
<th>Service Provider Contact</th>
<th>Internet2 Contact</th>
<th>Notes</th>
