

Getting Started with Grouper

Wiki Home	Download Grouper	Grouper Guides	Community Contributions	Developer Resources	Deployment Guide
---------------------------	----------------------------------	--------------------------------	---	-------------------------------------	----------------------------------

The Grouper Book was started in 2011 by a community member, but not completed. It aimed to provide documentation on Grouper which could take people from beginner to expert. It was to supplement and summarize [existing documentation which is actively updated](#). Contributions and comments from the Grouper community are welcome.

Sections on the Wiki will be marked in one of 4 stages:

- Blank - no real content yet
- Draft - initial drafts
- Reviewed - has been reviewed for accuracy (technical and linguistic)
- Completed - finished (at least for the current version)

Table of Contents

- [Introduction](#) - draft
- Part 1 - Introductory Information - draft
 - [What is Grouper and what can it do?](#) - draft
 - SQL database
 - Grouper API
 - Web Interface
 - Provisioning
 - [How could Grouper be useful to me? Typical use-cases](#) - blank
 - [What is Internet2 and where does Grouper fit into it?](#) - blank
- Part 2 - Grouper core
 - [Case studies](#) - blank
 - [Cardiff University](#) - draft
 - [Getting started with the quickstart](#) - draft
 - [Installing the quickstart - Linux](#) - draft
 - Installing a JDK - draft
 - Installing the RPM version of the JDK - draft
 - Installing the self-extracting version of the JDK - draft
 - Installing Tomcat - draft
 - Installing Apache Ant - draft
 - Setting up the quick start - draft
 - Starting the quickstart - draft
 - [Installing the quickstart - Windows](#) - draft
 - Installing a JDK - draft
 - Installing Tomcat - draft
 - Installing Apache Ant - draft
 - Setting up the quick start - draft
 - Starting the quick start - draft
