## Grouper Call 15-Nov-2017

### Attending:

- Chris Hyzer, Penn, Chair
- Chad Redman, UNC
- Shilen Patel, Duke
- Carey Black, (Matt), tOhio State Univ.
- Bert Bee-Lindgren

**Grouper Action Items are here** <https://docs.google.com/document/d/1jQCt1nICmVVZsU8iprjDw0WbmnUt87NsS7rdKmfMo/edit>

- Internet2 Intellectual Property Framework:  
\_ <http://www.internet2.edu/membership/ip.html>
- Review AIs : <https://docs.google.com/document/d/1jQCt1nICmVVZsU8iprjDw0WbmnUt87NsS7rdKmfMo/edit>

### DISCUSSION

#### Current work tasks

Vivek – Grouper Loader metadata

#### Chris –patches, deprovisioning

Deprovisioning: Reviewed last call's discussion... moving forward

#### Bert – PSPNG

Issue with ldap running in docker"tier-pack-grouper@[internet2.edu](mailto:internet2.edu)"  
Try emailing grouper-users, gasper, and <tier-pack-grouper@[internet2.edu](mailto:internet2.edu)>  
Send dockerfile to help people reproduce

Priorities/Plan:

1. Get test harness working again
2. Test PSPNG's group-editing abilities and build patch
3. Add full-attribute-control feature
4. AIs

Is Docker the future for testing Grouper?

Matt suggests using vagrant since it is VM and doesn't have the Docker warts

Shilen loves Docker, hasn't used vagrant

API test suites are missing since they integrate with other things not available

Complexities of Docker in prod doesn't exist in dev

Running one command in Docker??? Weirdness to get it right. Ignoring the religion of one process per container

Each test starts from pspng installed on top of grouper layer, everything gets thrown away after the test

Vagrant can work with docker

[AI for Bert] Talk to John Gasper or the lists and figure out issues and make a wiki to document testing Grouper with Docker so other parts of Grouper can use it (e.g. messaging)

#### Shilen –GSHNG, vtldap -> Idaptive

- Will look at emails Bert sent about vtldap -> Idaptive
- If patch is applied and running java 1.6, revert to legacy gsh.
- What jars are being added/replaced: groovy, cline, common-cli

**Issue roundup**

[AI for Chris] note the page Matt noted about externalizing privileges and how we can't do that in Grouper now

Next Grouper Call: Wed. Nov 29, 2017
