

Services Widget Plugin

The Services Dashboard Widget (ServicesWidget) is a [Registry Dashboard](#) plugin that renders [Registry Services](#) for the current user. At this time, the services widget supports only CO-level services.

Configuration

1. This is a non-core plugin, see [Installing and Enabling Registry Plugins](#) for more information.
2. Once installed, this plugin requires no configuration. It will simply render into the dashboard the available services defined for the current CO.
