

InCommon Trusted Access Platform Release

1. Docker Containers

These Docker containers simplify the installation and configuration of the software. They are pre-configured to work well with the InCommon Federation.

Shibboleth IdP Docker Linux Container (4.2.1)

- Current release: 20221117
- Container Image Name: i2incommon/shib-idp:4.2.1_20221117
- Notes: bump Tomcat to 9.0.69
- [Container Source Code](#)

Shibboleth IdP Config Builder Container

- Current release: 0.7
- Notes: add views directory to generated config
- [Container Download](#)
- [Container Source Code](#)

Shibboleth SP Linux httpd Container (3.4.0)

- Current release: 20221103
- Container Image Name: tier/shibboleth_sp:3.4.0_11032022
- Notes: Update SP, add security scan
- [Container Source Code](#)

Shibboleth IdP-UI Docker Linux Container (1.15.2)

- Current release: 1.15.2 - 2022/11/16
- [Release Notes](#)
- [WAR file release](#)
- Container Image Name: i2incommon/shib-idp-ui:1.15.2
- [Container Repository](#)
- [Container Source Code](#)

Grouper Linux Container (2.6.18)

- Current release: 2.6.18
- Container Image Name: i2incommon/grouper:2.6.18
- [Container Source Code](#)
- [Release Notes](#)

Grouper Linux Container (2.5.x)

- Current release: 2.5.60
- Container Image Name: i2incommon/grouper:2.5.60
- [Container Source Code](#)
- [Release Notes](#)

COmanage Registry Linux Container (4.0.2)

- Current release: 4.0.2
- Container Image Name: i2incommon/comanage-registry:4.0.2-20221117
- See also the COmanage Registry Cron image: i2incommon/comanage-registry-cron:4.0.2-20220223
- [Container Source Code](#)
- [Release Notes](#)
- [Notes on cron container for running Registry JobShell jobs](#)

COmanage Match Linux Container (1.0.0)

- Current release: 1.0.0
- Container Image Name: i2incommon/comanage-match:1.0.0-internet2-tap-1
- [Container Source Code](#)
- [Release Notes](#)

midPoint Linux Container (4.4)

- Current release: 4.4.1
- Container Image Name: tier/midPoint:latest
- [Container Source Code](#)
- [Release Notes](#)
