

# Registry Installation - Testing

- [Testing](#)
- [Next: Registry Installation - Setting Up Your First CO](#)

## Testing

To test open a web browser and browse to <https://yourserver.org/registry> (or wherever you mounted the registry for your web server). You should see the page "Welcome to COmanage" and a link to "Login". Click on the link and you should be prompted to authenticate using whichever mechanism you configured. After properly authenticating you should see the COmanage Registry dashboard.
