Higher Ed Cloud Community

The higher education cloud computing community is an active, thriving, sharing conversation between schools, community partners and individuals. This community focuses on the infrastructure (IaaS) and platform as a service (PaaS) ecosystems. It is built for higher ed, by higher ed. We welcome all to participate with an understanding that the goal is to promote the most secure and efficient use of cloud computing in support of the mission of our institutions. While we welcome the cloud vendors to participate in the debate and sharing of information it is never to be used for sales.

As the use of hyper-scale computing at community colleges, colleges and universities grows, so do the questions, challenges and lessons learned by each of us. Efforts to share those challenges and lessons and to ask those questions are also growing. This site attempts to bring together those conversations and the resources they produce in the hope that you will engage and encourage your colleagues to engage. Together we will raise our institutions’ collective CloudIQ.

Community Cloud Conversations

| EDUCAUSE Cloud Computing Community Group (CCCG) | The Cloud Computing Community Group provides participants with the opportunity to learn about and discuss the challenges and opportunities associated with the adoption of cloud computing in colleges and universities. Examples of discussion topics include cloud contract negotiation and management, cloud vendor relationship management, IT service management practices, compliance and legal issues, data privacy and security considerations, cloud identity and access management, cloud service integration (cloud to cloud and cloud to on-premise), skills and staffing implications, and cloud use cases to enable institutional agility, efficiency, and innovation. This group meets virtually every month, in person at the EDUCAUSE Annual Conference and uses its list and Slack workspace to discuss issues throughout the year. The Cloud Computing Community Group and Internet2 have long partnered to cultivate the cloud computing conversation in higher education. Beginning with the EDUCAUSE/Internet2 Joint Cloud Working Group, Internet2 has provided infrastructure and logistical support to the CCCG. Internet2 hosts the CCCG monthly calls and their meeting artifacts as well as the Higher Ed Cloud Wiki. Monthly meetings  
  • Format: Alternate between presentations one month to open discussion the next  
  • When: Occurs the fourth Wednesday of the month at 9am PT/12pm ET.  
  • Where: https://internet2.zoom.us/j/91519802344  
  • Running Agenda/Notes: https://tinyurl.com/EDUCAUSE-CCCG  
  • Download calendar invitation: https://drive.google.com/file/d/1NuRkDABq5a7wPduAZr6nixXqYiEbdTwG/view?usp=sharing (Note for Google Calendar Users: Download the .ics file. Go into the Settings inside Google Calendar. Select Import and navigate to the downloaded .ics file. It should import it into your calendar.) | CCCG co-chairs: cccgleads@lists.berkeley.edu (term ends) | Join the CCCG Slack Workspace Join the CCCG Mailing List |

• Sean O’Brien sobrien@internet2.edu
Higher Education Cloud Forum (CF)
The Cloud Forum is an annual gathering hosted by the higher ed cloud crowd that began at Cornell University in 2015. This event brings together the IT professionals who manage cloud computing at many of the top research and education institutions around the country. Attendance is strictly limited because we gather in a single auditorium-style classroom. Thanks to the intimate setting and higher education IT’s history of sharing, the conversations are candid, productive and often quite entertaining. We share successes, failures and lessons. We challenge our peers with the problems we are facing in hopes of tapping the wisdom of the crowd.

The event is for higher education, by higher education. We invite the cloud computing vendors most widely used by higher education to send representatives, but they do present. They are there to listen and learn about higher ed’s cloud challenges.

After 2021 the Cloud Forum left its nest and hit the road with the assistance of Internet2. The 2022 Cloud Forum was held at Washington University in St. Louis and 2023 will be at Emory University in Atlanta. For details see: https://internet2.edu/cloud-forum.

Bob Flynn – Chair
bflynn@internet2.edu

Links to virtual Cloud Forum content are listed below.

Internet2 Events (I2)
Webinars, workshops, training sessions, and community gatherings all fit within our mission of supporting and expanding the community. Internet2 works to convene the community to help institutions and colleagues share solutions and best practices.

These include

- I2 Online (I2O) - A series of webinars to showcase the community’s work and share knowledge around cloud technologies to help facilitate their use in the research and education community.
- Internet2 Community Building (I2) - Community convening with the goal of tackling cloud technology challenges together.
- NET+ (I2 NET+) - Meetings, Town Halls, and other discussions that take place as part of the Internet2 NET+ program for subscribers that are opened up for the broader community or have the recordings posted afterwards.

Bob Flynn
bflynn@internet2.edu

View upcoming or suggest event topics

Organic Community Topics (COMM)
Anytime a conversation is taking place that would benefit from the involvement of that organization’s peers in the higher ed cloud community, we will try to share it here. That could be a request from a number of schools to have another school share what they are doing or one school might have invited a cloud provider in for a demonstration. Whatever the case, if it is information sharing and collaboration at its core (rather than sales) we welcome its inclusion here.

<td>6/28/2023</td>
<td>CCCG Monthly Call - Cloud Forum Redux</td>
<td>Contrary to on premise infrastructure, one cannot simply ‘set it and forget it’ in the cloud as resources are billed by the hour (or minute!). Out of this paradigm, came a new specialty for IT folks – FinOps (Cloud Financial Management). This month we have wonderful speakers featured at Cloud Forum 2023 presenting on their experience developing and managing FinOps. The number one cloud comment I get from Executives, “I hear everything is much more expensive in the cloud”. My response, “Not if managed correctly”. Please join us to learn FinOps tips and tricks from renowned higher ed experts.</td>
<td></td>

<td>Maggie Spangenberg, UT Austin</td>
<td>CCCG</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• UT Austin will share their FinOps journey from initial cloud exploration to exponential growth. UT’s processes needed to evolve as cloud spend went from nothing to over $1M annually. UT is planning to show dashboard visualizations that allow departments across campus to see their current spend, cost optimization opportunities, and usage data. There are also internal processes for tagging cloud resources and billing back to departments for recovering spend.</td>
<td></td>

<td>Jonathan White, UCF</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Has someone asked you what your university is spending in the cloud? If not, they will. One of the first steps to answering this question is tagging your cloud resources. UCF recently finished a major infrastructure tagging project and this presentation will highlight the steps we took to implement tagging across Azure, AWS, and eventually, Google Cloud. Using documentation from these cloud providers, we developed a multi-step project plan around discovery, design, remediation, and governance. We will share this plan, best practices, lessons learned, pain points, and provide step-by-step guidance so that you’ll be ready to implement tagging at your university.</td>

| 5/3    | Infrastructure & Platform Services - Search for good tooling: RONIN for Researchers - Simplifying the Cloud |         |
|        | In 2021 Internet2 NET+ Infrastructure & Platform Services program manager Bob Flynn put out a call to the community to identify the greatest areas of need for tooling to help them run the major cloud platforms at scale at their institutions. That call included a survey and that survey resulted in our 2022 exploration and ultimate agreement to create a higher ed Kion program. This year we are moving down the list of survey results to revisit RONIN. Please join us for a fresh look at RONIN and help us assess community interest in a NET+ RONIN agreement. |
|        | **Description**: Researchers venturing more and more into using cloud computing and commercial cloud vendors. Many of them do not have experience with system administration or managing cloud services. This can present a challenge to groups who do not have the capacity to hire a cloud specialist to manage infrastructure for them and may lead to less utilization of cloud services. |
|        | Over the last few years, the Advanced Research Computing (ARC) team at the University of British Columbia (UBC) has explored various cloud platforms and solutions to help UBC researchers harness the power of the public cloud and enhance their computing capabilities. |
|        | Our journey with RONIN started in January 2020 with an in-person demo of the RONIN platform. We transitioned our successful RONIN Platform pilot to being the first University in North America to use RONIN as a full-service cloud offering to the UBC research community. |
|        | We will briefly discuss what ARC is and our role at UBC. Our researcher community and the challenges faced with public cloud using the user interfaces on current cloud providers. We will share our experience with RONIN and demonstrate a live demo of what a researcher just starting out will experience on RONIN and what it takes to set up their workflow in a cloud environment. |
|        | **When**: 1 pm PDT / 4 pm EDT (duration 1 hour)         |

Cloud Teams | Higher Ed Models

This month we will cover a heavily discussed topic in the cloud space – Cloud Teams. As you build in the cloud, you need someone designated to properly maintain workloads. Is that a team of one, a brand-new team, or a team of existing staff that are working in a hybrid environment? What roles make a successful Cloud Team? How are responsibilities divided up? How do you get folks trained? When is the best time to formally establish a Cloud Team? Join us to explore different Cloud Team models with our esteemed panelists.

- **Time:** 9am PT/12pm ET
- **Location:** https://internet2.zoom.us/j/91519802344

Infectious disease genomics is a rapidly changing field within public health. The increased need for genetic characterization during the SARS-CoV-2 pandemic combined with newly emerging sequencing technologies has led to a wide adoption and application of sequencing approaches across public health laboratories. This in turn has created a need for compute environments that can handle complex bioinformatics workflows and scale to meet a growing need. The Wisconsin State Laboratory of Hygiene (WSLH) has adopted a Cloud based approach that leverages AWS services to build a highly reliable infrastructure that is both cost effective and highly scalable. When combined with Nextflow pipelines utilizing Docker containers the result is a highly reproducible production analysis environment that is capable of supporting a variety of public health goals including infectious disease surveillance and outbreak investigations.

- **Time:** 9am PT/12pm ET
- **Location:** https://internet2.zoom.us/j/91519802344

Amazon Omics helps healthcare and life science organizations and their software partners store, query, and analyze genomic, transcriptomic, and other omics data and then generate insights from that data to improve health and advance scientific discoveries.

Learn how Amazon Omics provides scalable workflows and integrated tools for preparing and analyzing omics data and automatically provisions and scales the underlying infrastructure so that you can spend more time on research and innovation. Amazon Omics supports large-scale analysis and collaborative research.

This session is for research decision-makers, researchers, and RCD team members who want to learn how Amazon Omics can accelerate research, support large-scale analysis, and generate insights to improve health and advance scientific discoveries.

- **Time:** Wednesday, Feb 15, 11am PST/2pm EST
- **Registration:** https://internet2.zoom.us/webinar/register/1716734475521/WN_e2gYTYC8TGiBvxEbF_3A

## Achieving Multi-Cloud Control and the Freedom to Innovate

Whether your institution is starting on its cloud journey and you’re balancing innovation and sustainability, or you are trying to bring some order to years of organic experimentation, it requires practices, planning, and tooling to manage a multi-cloud environment. In this session, we’ll hear from Washington State University and Princeton University as they share their progress on the cloud adoption path and how they are tackling the challenge of ensuring control while providing freedom to users to innovate.

**NOTE:** Both speakers will be talking about the role that Kion plays in these efforts.

- **Post-meeting assets** (recording, slides, etc.)
Stanford Technology Platform Assessment and Strategy Peer Discussion

Stanford is currently underway with an initiative to evaluate our IT Portfolio to review drivers, governance, funding, and strategies being used to inform thoughtful cloud deployment models. As part of this effort, we would like to learn from our peers, by collecting data in the form of the questions found in this sheet. Please take a moment to provide your input. While data is being collected, we will be scheduling two one-hour meetings (February 7, 9 12pm ET) for open dialog and collaboration. I am happy to share the methodology, recommendations and results of this effort with those that are interested.

- Time: Tuesday Feb 7 AND Feb 9 (two options to attend) 9am PT/12pm ET
- Location: https://stanford.zoom.us/j/96042520479?pwd=OS90ekVPMm1qakTaTEhGUVNpaFB0QT09

Lucrecia Kim-Boswell

CCCG

Special Presentation: RNP Presentation on MultiCloud & DevSecOps

The CCCG will be hosting a special presentation on Monday, February 6th, 2023 9am PST /12pm EST.

Rede Nacional de Ensino e Pesquisa (RNP) is the Brazilian national research and education network (NREN), roughly equivalent to the role Internet2 plays in the US. Not only do they provide secure and high-capacity internet, but they do targeted development services and support innovative projects to further the social good. Their system includes universities, educational and cultural institutes, research agencies, teaching hospitals, parks and technology centers. With this, they benefit 4 million Brazilian students, teachers and researchers.

Seven years ago, when RNP started to work with public cloud, they had a very traditional dev team. Their applications ran on premises and they had very little automation in their development processes. They started to lift & shift systems to the cloud but they did not feel they were really reaping the benefits of the public cloud or of DevSecOps practices. They found it difficult to become a “Cloud Native / DevSecOps” Organization.

It took 4 years and an iterative process to transform themselves into a cloud-savvy, DevSecOps-practicing, actively-learning organization. They would like to share their journey, how they operate now, and the impact these changes have had on their work. In addition to the lessons learned along the way, they will discuss the tools they have developed to support their work and use cases they have applied them to.

Sergio Leal, Head of Solutions Architecture (RNP)

CCCG

Monthly Call - Getting started with the cloud (Best Practices)

Hear stories from our panelists on getting started in the cloud. Panelists will discuss their cloud journey, lessons learned, what they would do if they had to do it again, and offer some guidance for our community.

Afterwards, we will discuss the formation of a Cloud Best Practices Working Group and will seek volunteers from our community.

- Time: Wednesday, 1/25 at 9am PST / 12pm EST
- Location: https://internet2.zoom.us/j/91519802344

Rick Rhoades (Penn State University)
Shelley Rossell (Univ of Chicago)
Bill Thompson (Lafayette)
Kevin Willey (Bucknell University)

CCCG

November/December Monthly Meeting - Review of EDUCAUSE 2022, Cloud Forum 2022, and I2 Technology Exchange 2022

As we look forward to the new year, your co-chairs are starting to think about 2023 and what our priorities are for the CCCG. Please join us to review and discuss the various conferences in the fall. What were your takeaways? Any sessions worth bringing to the larger community? This will be an opportunity for all our community members to provide feedback for the coming year? What's working? What's not? Trends we should be focusing on?

- Speaker: Niranjan Davray, James Monek, Kari Robertson

CCCG

AWS Control Tower in Higher Education

Please join a discussion about Control Tower in Higher Ed. We'll focus on the main differences and gotchas for higher ed vs. standard deployments and talk about starting fresh with CT or bringing it into an Org with existing accounts.

- Time: Wednesday, 11/30 at 1pm PST / 4pm EST
- Recording: https://drive.google.com/drive/folders/1ouDedcyeR2iR5nxaf2Ldt_sautMjEjM?usp=share_link

<td>Key Considerations for Supporting Academic Researchers Researchers are increasingly leveraging computational technologies as a key approach within their research. More and more disciplines are leveraging data, simulation, and advanced analytics to perform their research. Researchers have increasingly complex requirements and expectations as they join institutions and funding agencies are requiring new and more complex data retention approaches. At the institutional level, developing a strategy to support the wide range of requirements in a supportable, cost effective, and secure way has become a critical strategic initiative. This session will discuss a perspective on how to support researchers, impacts from the funding agencies and AWS technology solutions.</td>

<td></td>
</tr>
<tr>
<td></td>
<td>• Session Description: Digital Transformation can drive improved student outcomes, speed time to science, and increase agility within higher education institutions. Higher education leadership, responding to student and faculty demands, look to incorporate sustainability goals and practices into the university experience. In this session, we’ll talk about sustainability transformation, how we’ve been approaching it at Amazon and AWS, and actions higher education customers can take to incorporate sustainability into their digital transformation efforts.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Speaker Bio: Hahnara Hyun is a Partner Solution Architect for Amazon Web Services. Hahnara has a background in software engineering. She began her journey in tech at Fullerton College and received her Computer Science B.S. from the University of California, Irvine where she was an undergraduate machine learning researcher. She found her passion in enablement, sustainability, and cloud architecture. As a result, in her day-to-day role, she develops AWS GameDays to enable partners and customers to build on AWS. Hahnara is also a public speaker for AWS and ran sustainability enablement sessions at re:Invent 2021. In her free time, Hahnara plays volleyball though she’s not very good yet and loves to cook, losing most of her free time making multiple trips to the grocery store grabbing forgotten items.</td>

</table>
On February 23, 2022, Internet2 attended the CCCG call to talk about their Networking for Cloud services and to query the group about how the future Cloud Connect console will look, feel and work. During the discussion, attendees asked about the multi-cloud environment and asked for additional discussion on multi-cloud. They also touched on how a layer3 "virtual cloud router" solution that doesn’t require hair pinning traffic between clouds through your campus or data center could reduce complexity, improve latency, increase performance, and reduce cost. The I2 networking team believes that together we can develop a solution that meets these goals, supporting your critical cloud workloads.

To continue the discussion, we have scheduled an open discussion session on multi-cloud networking hosted by Internet 2. Please invite all interested colleagues. We will also record the session for those unable to attend.

**Topic:** Multi-Cloud Community Discussion

**Time:** 11:00 AM Pacific Time / 2:00 PM Eastern Time

**Location:**
https://internet2.zoom.us/j/95984070917?pwd=ZVl5NjNKZkJXT1E2aDE2Q2RLUWhnZz09

Meeting ID: 959 8407 0917

Passcode: 112044
**12/8/21**

**Special Edition Monthly Call - The Big Lie: Cloud Computing - Bill Wrobleski, Penn State**

The Big Lie: Cloud Computing - Bill Wrobleski, Penn State

**12:00pm ET - 12:45pm ET**

In 2011, I started evangelizing for the Cloud. It’s been 10 years, so the future I promised has come true, right? I’ll revisit the vision we imagined, what actually happened, and explore the question “Is cloud computing the biggest disappointment for higher education this century?”

**EDUCAUSE 2021 and Cloud Forum 2021 Wrap-ups. What are we planning for 2022?**

Co-chairs will provide a brief wrap up of the recent conferences and feedback we received for what the CG should be focusing on in 2022. And yes, we want your feedback before you leave for the holidays, so there will be homework.

- **When:** Wednesday, December 8 2021 9am PDT/12pm EDT
- **Where:** https://internet2.zoom.us/j/91519802344
- **Running Agenda/Notes:** https://tinyurl.com/EDUCAUSE-C CCCG

**11/18/21**

**Live from Cloud Forum 21 - Presentations**

Cost is always a concern when moving from the traditional capex model on prem to the opex model in the cloud. Declan Fleming and Jessica Respicio from UC San Diego will share what they learned about cost (and business) optimization from their experience with cloud at UCSD and CloudBank.

In our final presentation, Penn State’s Rick Rhoades will share how pandemic hiring challenges and an innovative talent-sharing program led to surprising success and unexpected outcomes.

See the Cloud Forum Agenda for descriptions, slides and recordings.

**11/18/21**

**Live from Cloud Forum 21 - Researcher (Amazon)**

Researcher presentations are a highlight for Cloud Forum attendees each year. The researchers are asked to focus on their research, not the underlying cloud technology, though that does sometimes poke through. These talks are meant to remind us cloud professionals of the importance of the work we do each day.

This year’s researcher nominated by Amazon is Professor Eric Venner, Associate Professor, Division Director for Bioinformatics from the Human Genome Sequencing Center – Clinical Lab at the Baylor College of Medicine with a talk titled “Implementing Genomic Medicine at the HGSC.”

**11/17/21**

**Live from Cloud Forum 21 - Researcher (Microsoft)**

Researcher presentations are a highlight for Cloud Forum attendees each year. The researchers are asked to focus on their research, not the underlying cloud technology, though that does sometimes poke through. These talks are meant to remind us cloud professionals of the importance of the work we do each day.

This year’s researcher nominated by Microsoft is Dr. Travis Osterman of Vanderbilt University Medical Center with a talk titled “Lessons Learned from VUMC’s First End-to-End Cloud Project.”

**11/17/21**

**Live from Cloud Forum 21 - Presentations**

The maintenance and lifecycle of data is a never-ending challenge. In our first presentation, we’ll hear about research into how schools are dealing with the seeming end to unlimited cloud storage being done by Internet2’s Oren Sreebny. Oren will be joined by Helen Hockx-Yu who will share how Notre Dame is approaching the problem.

In our second presentation, Ken Bigelow and Venkat Mahadevan from the University of British Columbia will explain their efforts to make use of cloud computing easier for their research community.

See the Cloud Forum Agenda for descriptions, slides and recordings.

**11/16/21**

**Live from Cloud Forum 21 - Researcher (Google)**

Researcher presentations are a highlight for Cloud Forum attendees each year. The researchers are asked to focus on their research, not the underlying cloud technology, though that does sometimes poke through. These talks are meant to remind us cloud professionals of the importance of the work we do each day.

This year’s researcher nominated by Google is Luigi Marchionni, Associate Professor of Pathology at Weil-Cornell Medicine. Professor Marchionni’s talk is titled “A Hitchhiker’s Guide to Big Data Based Biomarkers.”
### 11/16/21
**Live from Cloud Forum 21 - Lightning Talks**

The first day of the 2021 Cloud Forum's online content kicked off with nine (9!) lightning talks from the National Institutes of Health, University of Chicago, CloudBank and Internet2. For details, slides and a recording of the talks see, the Cloud Forum agenda.

- Philip Meacham - NIH
- Yanik Wynter – NIH
- Carlo Espiritu - NIH
- Joel Peterson - NIH
- Rob Falland - UW, CloudBank
- Shelley Rossell - Univ Chicago
- Cornelia Bailey - Univ Chicago
- Ananya Ravipati - Internet2
- Bob Flynn - Internet2

---

### 10/29/21
**EDUCAUSE 2021 Face to Face meeting**

Join this discussion on the challenges and opportunities associated with cloud computing. Topics will include contract negotiations, vendor relationship management, compliance and legal issues, data privacy and security considerations, identity and access management, service integration, skills and staffing implications, and cloud use cases that enable institutional agility, efficiency, and innovation.

- Jody Couch, UC Berkeley
- Damian Doyle, UMBC
- James Monek, Lehigh University

---

### 9/22/21
**Cloud FinOps**

Cloud costs keeping you up at night? Are you wondering how to keep costs from running out of control? What practices should you put in place now to stay on top of the cloud spending game?

A group of higher education cloud professionals with expertise in cost optimization and cloud financial best practices met regularly through the spring and summer pooling their expertise in an effort to create a list of tips and techniques for making the most of your cloud dollars.

In this session they shared those pearls of wisdom with you, their colleagues in higher ed cloud.

Find their slides, full tip sheet, presentation recording and more on the session resource page.

- Matthew Chess - University of Michigan
- John Finigan - University of Colorado Anschutz Medical Campus
- Mike Florian - University of Arizona
- Bob Flynn - Internet2 (staff support)
- Erik Lundberg - University of Washington
- Sara Jeanes - Internet2
- Timothy Middlekoop - internet2
- Richard Murillo - Harvard University
- Kari Robertson - University of California Office of the President
- Ben Rota - Harvard University
- Nick Young - University of North Carolina Greensboro
- Jonathan White - University of Central Florida

---

### 8/26/21
**Special Edition of Monthly CCCG Call**

We are excited to announce that for this month’s call, the Research Computing and Data CG will be partnering with the Cloud CG! The call will be held on Thursday, August 26th from 1-2 pm ET. In this call, we will discuss top use cases for cloud for research.

We will first hear from you on what your top use cases are, and what services you are keeping on-premise. We will then explore how to manage distributed costs associated with cloud usage. We will discuss models and resources used to support researchers using the cloud, as well as the level of support provided at different institutions.

Please download and import the following iCalendar (.ics) files to your calendar system.

- Monthly: https://educause.zoom.us/meeting/join?qTsuGNEIKXMKLyvcd6yYJuQ3br/ics?icsToken=98yKuCqgssTIOViBuCRowcHiyqM_TwtrmbY14m7NLjg_exXf1RbC9q0N4iD

</table>
3/24/21 Using Cloud for Research at Scale
- Use of GCP by Rubin Observatory
- Using commercial clouds to process IceCube jobs

- The Vera C. Rubin observatory will conduct an 10 year astronomical survey of the southern sky, the Legacy Survey of Space and Time (LSST). This will produce 20TB of data nightly. In the run up to operations, which should start late 2023, we have started a large scale three year experiment with Google. This talk will introduce Rubin Observatory, the data processing and access and a little of what we are doing with Google Cloud Platform (GCP).

- William O'Mullane
- Igor Stiligoi

3/12/21 Google Team-selected Researcher + Community Presentation
- Disorganized Organizations: Balancing the need for control with distributed IT
- Leveraging VirtualFlow to harness the power of cloud computing to target COVID-19 proteins via ultra-large virtual screens

- Ben Rota – Harvard

3/5/21 Jupyter on Google
We'll have Marc Cohen from Google leading us through the managed offerings from Google, plus folks from UMBC and NYU talking about their Jupyter Hub deployments on GCP, and Burwood talking about how partners can help with Jupyter.

- Marc Cohen - Google

2/24/21 How Universities are Providing Self-Service Cloud Environments for Researchers
- RONIN gives researchers explicit budget control and forecasting so they can use their research budgets effectively
- RONIN also provides research IT with administrative oversight into researcher spend and control over the security policies enforced across all RONIN users
- Service Workbench promotes collaboration around data, by enabling researchers to upload and share data sets, and also allows quick access to public research data sets hosted by AWS
- Service Workbench provides researchers with spend transparency and control by enabling them to see individual workspace costs, as well as spend across projects and organizational units.

- Parice Brandies, PhD Candidate, University of Sydney School of Life and Environmental Sciences
- Paul Avillach, Assistant Professor in Pediatrics & Biomedical Informatics, Harvard Medical School and Boston Children's Hospital
- Nathan Albrighton, CEO and Founder of RONIN
- Madhu Bussa, Sr. Solutions Architect, AWS
- Oren Sreebny, Consultant Internet2 Cloud Programs, Internet2

2/24/21 Open Discussion
- Presentation and discussion by Ben Rota from Harvard summarizing results of a recent Research Computing in the Cloud survey.
- Discussion on how to fund ongoing cloud costs (storage and compute) for research projects once the grant expires
- Discussion on the costs associated with AWS Transit Gateway and the types of behaviors and services it enables (or not) at Higher Ed institutions

- Ben Rota – Harvard

| 8/5/20 | Q&A with IU Box Migration team                                       | As a number of schools review their storage and collaboration strategies, Indiana University can provide insights from its experience. Indiana University was the first high-profile higher education customer to announce it was moving to Microsoft and Google and away from Box. IU's early start resulted in many schools looking to learn from their research, successes and failures. IU has received several inquiries from other higher ed schools and is offering to discuss its experience and considerations. As a result, the IU Box migration team put on an infoshare in June covering their process, communications, technical decisions and lessons. The recording of that infoshare, as well as slides and detailed communication plan, can be found at https://drive.google.com/drive/folders/1z7YrNiND9IO-Mr4eZzslMU4bqq9B6aAwS5?usp=sharing. It's one thing to listen to the story, it's another to chat with the story tellers. In the wake of the infoshare the calls for meetings with the migration team have continued to come. In order to allow this hardworking team to focus on their hard work, we have arranged a dedicated Q&A session for any and all to bring their questions about tools and timing, dependencies and decisions, method and messaging, and so much more. NOTE: We learned our lesson last time and we have a larger-capacity Zoom roof for this call. | • Adam Sweeney - Indiana University  
• Justin Zemlyak - Indiana University | COMM

| 7/22/20| Open Topic Discussion with a twist                                 | Many in the community are taking part in the Higher Ed Cloud Networking & Security Workshop series. At the start of that series, attendees brainstormed a number of questions for the cloud vendors. Among those questions were many that were better suited as a discussion between members of the community. July would normally be an open topic discussion. We are keeping with that in spirit, but we are going to seed the conversation with a selection of questions from the list. | | CCCG

<td>Indiana University Box Migration Infoshare</td>
<td>Switching cloud storage platforms can be challenging, especially when petabytes of data are involved. Indiana University has begun the process of switching from Box to Microsoft and Google for end-user cloud storage and is looking to share its experience and learn from the community. Topics will include IU’s motivations for a move, selecting a migration vendor, when to leave the legacy storage up or take it down during a migration, how to handle loss of features when changing platforms, what communications challenges universities will face, and how COVID19 complicates a storage migration.</td>

- **2019**
  - December 16 (combined Nov/Dec event) - Fall Conference Round-Up
    - Cornell Cloud Forum
    - Microsoft Ignite
    - AWS re:Invent
    - Internet2 Technology Exchange
    - Notes, recording and links
  - October 23 - Federated Access to Research Data
    - Dr. Craig A. Lee, Chair, NIST Public Working Group on Federated Cloud (lee@aero.org)
    - Khalil Yazdi, Chair, Open Research Cloud Alliance (khalilyazdi@outlook.com)
    - Slides, notes and recording
  - EDUCAUSE 2019 Face to Face meeting (Chicago, October 16, 2019)
    - Slides, notes and photo
  - September 25 - Open Discussion
    - Early survey results
    - EDUCAUSE F2F
    - CCCG Leadership transition
  - August 28 - Supporting Research in the Cloud - Round 1: The Human Bridge
    - Derek Morr (Cloud Solutions Architect) and Greg Madden (Associate CIO for Research) - Penn State University
• Rob Fathland (Research Computing Director) - University of Washington
• Marty Sullivan (Cloud Systems Engineer) - Cornell University
• (notes and recording)

* July 24 - Open Discussion
  • Funding for OS teams in the cloud
  • AWS Multi-Tenant vs Multi Account Strategy
  • Creating and tracking a ‘cloud innovation’ fund through optimization
  • How are you supporting researchers in the cloud?
  • Integration Tools
  • (notes and recording)

* June 26 - Cloud Community Events and Activity
  • Recap of Cloud Networking Workshop put on by U Michigan, U Minnesota and Internet2 (Alok Vimawala - UMich)
  • Update on Cornell Cloud Forum 2019 (Sarah Christen - Cornell)
  • CCGG Engagement Channels (Bob Flynn - IU)
  • CCGG Engagement Team (Jody Couch - UCSC)
  • (recording and slides)

* May 22 - Open Discussion
  • Announcements
  • Cloud Forum dates: November 6-8, 2019
  • Reminder: CFP for 2019 Cornell Cloud Forum closes June 1 https://bostonu.qualtrics.com/jfe/form/SV_bCyJsfOkPsm3tAh
  • #cloud_jobs channel added to CCGG Slack Team - post your cloud jobs there!
  • Firewallow in AWS: Paul Peterson from Emory talked about networking strategies for their non-research AWS environment. (slides)

* April 24 - Google Cloud Platform
  • Evolution of GCP at an Office 365 University – presentation by John Bailey, WUSTL
  • With Great Integration Comes Great Responsibility (a.k.a. GCP at a G Suite School) – presentation by Bob Flynn, IU
  • Google CAB GCP Track
  • News from Google Cloud Next
  • Tech bulletin: Don't fear the mystery folder. Unexpected visitor due to Google change https://developers.google.com/apps-script/guides/cloud-platform-projects. - Ananya Ravipati, IU
  • IU GCP configuration document https://iu.box.com/s/5h6zj95dawie8crigc8m1v647kksw20
  • Internet2 NET+ GCP contract - Sara Jeanes, Internet2
  • (notes | slides & recording)

* Mar 27 - Open Discussion
  • Performance testing of moving data from one cloud provider to another
  • SSO with AWS and how to federate external users
  • Upcoming AWS webinar series
  • Options for handling cloud training needs
  • Call for (self-)nominations for CCGG co-chairs
  • (notes | recording)

* Feb 27 - Open Discussion (notes)
* Jan 23 - Cloud Q & A for Small Schools (recording and resources)

* 2018
  • Dec 5 - Excerpts from the 2018 Cornell Cloud Forum (recording and resources)
    1. Title: Ouch! Commonly Overlooked (or Surprising) Cloud Costs
       Description: “Wait … that costs how much?” How do you prepare stakeholders for cloud-related charges that were
       provided ‘for free’ while on-premise? What new charges exist in the Cloud? What are the associated costs? Most
       importantly, who is going to pay them?
       Presenters: Kari Robertson and Glenn Blackler - UC Santa Cruz
    2. Title: Using AWS CLI with Shibboleth and Duo https://github.com/techservicesillinois/awscli-login
       Description: How can higher education give our faculty and staff convenient access to AWS tools without leaving behind
       a mess of long-lived secret keys? We’ll demonstrate a University of Illinois plugin to the AWS CLI which authenticates
       against Shibboleth with Duo and manages short-lived credentials, making it easy to be secure.
       Presenter: Chris Kuehn - University of Illinois
    3. Title: Kubernetes: Container Orchestration at Scale
       Description: Kubernetes is a resource scheduler that started as a Google project. Now it is the primary container
       scheduler being adopted across the spectrum of both cloud and on-prem based deployments. With an extensible scale-first
       architecture it’s easy to see why its adoption has outpaced other solutions such as Docker Swarm and Mesos. The goal is
       to present on the architecture of Kubernetes and basics of running Kubernetes at scale.
       Presenter: Jeff Sca - University of Michigan
       Resources: “Introduction to Kubernetes” open-source eight-hour 100-level labs: https://goo.gl/uHq6T4 and presentation: ht
       ps://goo.gl/Yb6Hfr
    4. Time Permitting: AWS re:Invent recap

* Nov 1 - Open discussion at in-person meeting at EDUCAUSE Annual Meeting
* Oct 24 - Open discussion (see notes)
* Sep 26 - Funding models for new cloud paradigms (speakers: David Seidl- Notre Dame, Ben Rota - Harvard)
* Aug 22 - Notre Dame and the Cloud - Over the past three years, Notre Dame University has moved more than 80% of their IT
    infrastructure and services to Amazon Web Services (AWS). On this month’s Higher Education Cloud Collaboration conference call,
    leaders from Notre Dame University will provide an overview of their move to AWS, and will share their lessons learned and advice
    for other institutions.
* Limit of recorded history
