Registry 1.0.5 Release Announcement

Internet2 and the COmanage Project are pleased to announce the release of COmanage Registry version 1.0.5. This release is a maintenance release. In particular, this version addresses

- Various bugs related to enrollment flow processing, including initial provisioning
- A bug related to group provisioning and Grouper integration

We recommend all deployments upgrade to this release. Deployments on 1.0.0 or later may upgrade directly to this release. Deployments on earlier versions must follow the previously described upgrade paths to 1.0.0 before upgrading.
