Final Report

The working group has completed its work, and the [Final Report is here](#).

OIDC/OAuth2 Working Group

This working group will survey the campus community and ask them to share information on the problems they are trying to solve with OIDC/OAuth2. By February, 2017, the working group will collect and review use cases and summarize the findings and conclusions, as well as recommendations and/or next steps for TIER, IdP/SP federating software, InCommon, and Federation-level support. The report will include thoughts on the urgency, if any, of the recommended actions. More information is available in the working group's [Charter](#).
