

Grouper loader diagnostics

Wiki Home	Grouper Release Announcements	Grouper Guides	Grouper Deployment Guide	Community Contributions	Internal Developer Resources
---------------------------	---	--------------------------------	--	---	--

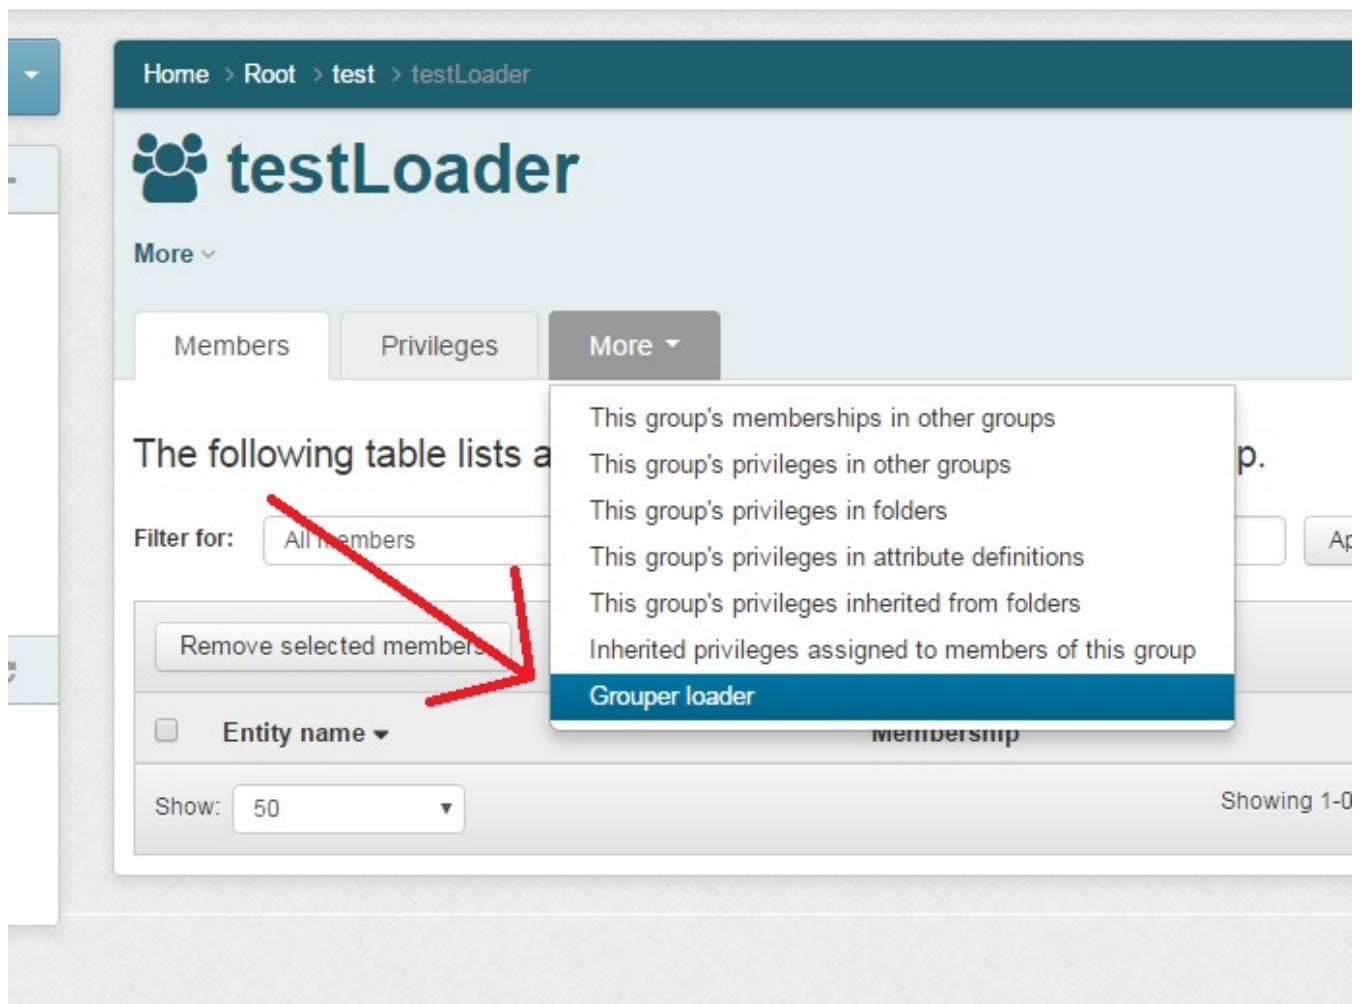

Grouper loader diagnostics will

- look at the configuration
- validate queries
- look in logs to see if your loader job is healthy

It will give you suggestions on how to fix the job is something is detected to be broken or even not ideal. This feature will **not make any changes** to the registry, it does not run a loader job.

Access the loader diagnostics screen from the UI

Access the grouperLoader UI screen for the group which has a loader job

Then click on "Loader diagnostics" from the "Loader actions" drop down:

Home > Root > test > testLdapGroupsFromAttributes

testLdapGroupsFromAttributes

More actions ▾

More ▾

Members Privileges More ▾

Loader settings

Loader actions ▾

This group has loader configuration

Source type	LDAP pull the members from an LDAP server. Can be SQL or LDAP
Loader type	LDAP_GROUPS_FROM_ATTRIBUTES returns subjects which have a multi-valued attribute e.g. affiliations where groups will be returned based on the attribute value. Can be LDAP_SIMPLE, LDAP_GROUP_LIST, or LDAP_GROUPS_FROM_ATTRIBUTES
Server ID	personLdap

- View loader settings
- View loader logs
- Run loader process to sync group
- Loader diagnostics
- Schedule loader process

Once you see the diagnostics screen, click the "Run loader diagnostics" button

Home > Root > test > testLdapGroupsFromAttributes

testLdapGroupsFromAttributes
