

Enterprise Architecture Maturity Model (EAMM-edu) Working Group

 This Working Group completed the [Enterprise Architecture Maturity Model for Higher Education](#) in 2017-2018. Please see that site; the information below is no longer being updated.

The Enterprise Architecture Maturity Model for Higher Education (EAMM-edu) working group will delineate a pathway for Enterprise Architecture practices in higher education from start-up through full maturity. This EAMM-edu will be predicated on existing industry frameworks and will serve as both a guide and assessment tool for practitioners and University leaders. The working group will also develop an Applied Practices Guide to address the required skills, methods and readiness indicators anticipated throughout the various stages of maturation.

We need your perspectives and energy. The effort will consist of conference calls every 2-4 weeks and short, interesting EA practice work assignments in between. The group will complete an initial draft by August 2017. If you are interested in getting actively involved, please reach out to the the [EAMM-Chairs](#).
