

# MACE-Dir legacy document recovery

I noticed the action item about finding old "recipe" documents. There are, by the way, more in the [Interim Trust and Identity Document Repository](#) that we've discussed in the past. For example,

- [Practices in Directory Groups \(2002\)](#)
- [A Recipe for Configuring and Operating LDAP Directories \(2.1\) \(2002\)](#)

FYI, the "repository" is called interim, as it's really just a wiki page with attachments for the documents we're collecting. The URLs of the documents are not (yet) stable, but there is descriptive and administrative metadata in a wiki table. As more documents are found, Emily and I can add them there.

David (Walker)
