## **Charter - Attributes for Collaboration and Federation WG**

The Attributes for Collaboration and Federation Working Group will:

- 1. Develop (and Execute if time permits) a Roadmap for Adoption of Attribute Release Policies (using the draft Steering Roadmap as a starting point)
  - a. Outreach [Steering] Identify the needed stakeholder groups, and identify or create the content and use cases that can educate those groups.
  - b. **Survey** [Working Group] Possible survey of the community on why attributes are NOT being released identify obstacles (maybe webinar?) completed by campus stakeholders as well as IAM person.
  - c. Consent [Working Group] Determine where "Consent" fits into the roadmap
  - d. Communication [ALL] Create a communication plan to inform InCommon Participants of recommendations and steps being taken to enable basic federated access
- 2. Recommend a default Attribute Release Policy (ARP) for InCommon participants
  - a. Global R&S for R&S SPs (See: Research and Scholarship Category and the R&S Attribute Bundle)
  - b. Recommended ARP for all other SPs in addition to, or a subset of, R&S
- 3. Review and enhance online content for IdP admins so they have a clear set of steps to follow to implement the desired approach (including possibly consent) once campus policy decisions have been approved.
- 4. Discuss making some level of attribute release (e.g. R&S) part of a future version of the AAC's Baseline Expectations for Trust in Federations.

## Other collaborative efforts:

- with TIER software packaging and InCommon Ops to give stakeholders some control via a set of tools (e.g. local similar to consent; new IC services (eg suggested Attribute Release Policies); etc)) to simplify and automate attribute release management. This may be part of the Roadmap, but likely executed by TIER software packaging.
- 2. with AACRAO members looking at Student Records and Data Disclosure.
