COmanage Installation Instructions

Regardless of which COmanage Product (eg: Registry, Registry PE, Match, Directory) is being installed, there are some common installation requirements, in particular around web server and PHP installation. Complete these common requirements before returning to product specific installation.

> ⚠ There are some minor product-specific variations within these instructions. If installing a second product on the same server as an existing product, be sure to review these steps to make sure the proper requirements have been met.

Common Installation Instructions

1. COmanage Installation - PHP
2. COmanage Installation - Web Server
