DKIM Deployment

Internet2, the Internet Society, and the InCommon Federation are collaborating on an activity to promote deployment of IETF Standard DKIM technology at higher-education and research sites. DKIM promises a variety of improvements in email reliability, trustworthiness, and usability when deployed in a way that takes advantage of existing trust communities, such as research and education federations.

Background:

- Introduction to DDX
- For detailed info:
  - IETF DKIM Working Group -- http://www.ietf.org/html.charters/dkim-charter.html
  - DKIM.org -- http://www.dkim.org/

Materials:

- DKIM Deployment Experiment Proposal
- User Stories
- Mailing lists and DKIM
- Mailing list archive: https://mail.internet2.edu/wws/arc/ddx

Meetings:

- 2008 Nov 16 @ IETF
  - Agenda for initial meeting
  - Meeting notes
  - Attendee Logistics
