

Working Group Deliverables and Recommendations

Documents produced by the Working Group that have passed through Community Consultation

- [Final Report of the Streamlining SP Working Group](#)
- [Streamlining SP Onboarding - Criteria Document](#)
- [Streamlining SP Onboarding - Questionnaire](#)

Documents produced by Working Group that are currently in DRAFT form

- [Streamlining SP Onboarding - Primer Document \(DRAFT\)](#)

--

Executive Summary (excerpt taken from the Final Report)

Criteria Document

- The 'Criteria Document' gives a Service Provider (SP) a high level overview of existing principles and standards, that when reviewed and followed as part of their onboarding process into InCommon, will ensure their application is able to maximize interoperability, user experience, and security within the InCommon federation.

Questionnaire

- For those SPs that need additional assistance or guidance with the 'Criteria Document', the 'Questionnaire' can be used as an interactive guide that walks the SP through the adoption of the material. This walkthrough style guide provides context, tips, and helpful resources to help an SP develop a better understanding of the criteria and assist them with criteria adoption.

Primer Document

- As a backdrop to the 'Criteria Document' and the 'Questionnaire', the 'Primer Document' was created to help onboarding Service Providers understand core concepts such as 'SAML', 'InCommon Aggregate', 'Shibboleth', and 'Metadata Exchange'. Giving the SP the prerequisite knowledge they need to better understand the terminology, concepts, and best practices within the 'Criteria Document' and 'Questionnaire'.
