Feature - Manage Entity Attributes

Idea: use Confluecne's Product Requirement Blueprint and integration with Jira to simplify cross product content tracking.

Target release	
Epic	IFMC-702 (much easier with Jira/Confluence Link)
Document status	DRAFT
Document owner	Steven Erickson (unicon.net)
Designer	Nick Roy (internet2.edu)
Developers	Emily Jeanes (google.com)
QA	David Shafer (internet2.edu)

Goals

- Provide RA the ability to view/customize/configure the support SAML entity attribute syntax

Background and strategic fit

todo: describe the rationale for having this feature in FM here.

Assumptions

Requirements

#	Title	User Story	Importance	Notes
1	View Entity Attribute List	As an RA I want to see the list of current entity attributes so that I can determine if a new entity attribute needs to be added or a current entity attribute needs to be updated.		**Option 1:** link to Jira story here IFMC-703
2	Story - View Entity Attribute List	As an RA I want to see the list of current entity attributes so that I can determine if a new entity attribute needs to be added or a current entity attribute needs to be updated.		**Option 2:** Linke to Confluence Story page (see link to the left)

Option 3: Insert an Jira filter report macro here to list all Jira issues linked to this epic, e.g.:

Key	Summary	T	Updated ⌄	P	Status	Resolution
CONF-30894	User is not prompted before overwriting changes of another user if attempting to save after an editor error is thrown	●	Oct 22, 2013	↑	RESOLVED	Fixed
CONF-30866	TableOfContents Macros navigation is not working in Firefox 23.x / 24.x and Opera 12.16	●	Sep 24, 2013	↓	RESOLVED	Fixed
CONF-30663	Left panel overlaps custom banner in Chrome	●	Sep 23, 2013	↓	RESOLVED	Fixed
CONF-30690	Dashboard popular stream won't render when it contains content from an anonymous user	●	Sep 19, 2013	↑	RESOLVED	Fixed

4 issues ⟳ Refresh

User interaction and design

much of the information at Manage Entity Attributes would be here.

Questions

Below is a list of questions to be addressed as a result of this requirements document:
