

CO API v2

- [Attributes](#)
 - [Sample Record](#)
- [Supported Filters](#)
- [Implementation Notes](#)
 - [Delete](#)

Resource	Cos
URL	/api/v2/cos
Supported Standard Operations	<ul style="list-style-type: none">• Add• Delete• Edit• View (one)• View (all)

Attributes

See [cos](#) for definitions of attributes.

Sample Record

```
{
  "name": "Research Collaboration",
  "description": "Pat's collaboration",
  "status": "A"
}
```

Supported Filters

No API specific filters are supported.

Implementation Notes

Delete

Unlike the standard Delete behavior, deleting a CO performs a hard delete (see [Changelog Behavior](#)), and all data associated with the CO (including history) will be physically removed from the database. To preserve this data, set status to Suspended (s) instead.
