### Overview

Each action item will have a lead and, in most cases, several group members associated with it. The lead will:

- Facilitate the development of group deliverables/goals
- Establish a timetable with milestones
- Represent the group in the status calls (see below)
- Ensure deliverables/goals/status updates get added to the wiki.

Action Items will have at most a 5 month duration. After that time, a collective decision can be made to extend or close down the group.
