

# Home

CManage is an Open Source Project that is focused on streamlining digital lifecycle management for your populations. It is part of the InCommon [Trusted Access Platform](#). In production, it consists of two tools: Registry and Match.

- **CManage Registry** is an identity registry with flexible enrollment and lifecycle management capabilities that help you meet your identity management objectives using standardized tools and approaches. It can be used as a central person registry, a guest management system, or a collaboration hub for scholarly collaborations.
- **CManage Match** performs identity de-duplication to help minimize the creation of duplicate accounts for the same individual. It provides a heuristic-based system for matching identity records across multiple authoritative systems-of-record. Match can be used with Registry or as a standalone product complementary to your other tools.

**CManage Registry**

*Identity Enrollment and Lifecycle Management*

**Version 4.3.3**

#### COmanage Newsletter #21 - April 2024

Laura Paglione ([google.com](https://www.google.com)) posted on Apr 30, 2024

We have been thinking about ways to make our documentation even more helpful than it already is. Today we introduce "Recipes" - instructions for configuring and using the connection of several features within COmanage tools to accomplish a specific goal.

## Open Office Hours

## Register for Training!!

Training on COmanage tools is offered twice per year by InCommon. Upcoming training is listed below.

[More information and registration...](#)

Join us for our next Open Office Hours!

## First Friday of the Month

at 12:00 PM (America/New York)

(no registration necessary)

[Subscribe to Our Calendar](#)

**About Open Office Hours:** *Each month you can bring your topics for discussion to the call. No need to register or spin up a presentation (but feel free if it suits you!), just show up!*

# The COnanage Community

## Participate in the COnanage Community

COnanage is a platform of open-source software that is used and supported by the community. There are several ways in which this community connects, each listed below with links to more information.

Community support is critically important to any open source project. The community drives the evolution of the software, supports its development financially and through in-kind support, and collaborates on the use cases that the software supports. We encourage you to join this community.

October 2024 (or upon request)

## COnanage Registry

Managing Identities & Collaborations Workshop

This virtual workshop provides a conceptual understanding of COnanage, an identity registry with flexible enrollment and lifecycle management capabilities to meet your identity management objectives.

October 2024 (or upon request)

## COnanage Match

Solution for Identifying Unique Records Workshop

This virtual event will get you started with COnanage Match. This cross-system matching engine provides a heuristic-based system for matching identity and other records across multiple authoritative systems of record.

## Acknowledgements

Ongoing support of the project is provided by Internet2 via the TIER Initiative and the InCommon Trusted Access Platform Program.
