

Identifier Assignment Job Plugin

The Identifier Assignment Job Plugin runs bulk [Identifier Assignment](#) for a CO.

Configuration

1. This is a core plugin, and so is enabled by default.

Usage (Asynchronous)

This Job can be scheduled using the UI via *CO > Configuration > Identifier Assignments > Autogenerate Identifiers For All*.

Queued jobs will be processed by [Registry Job Shell](#) when run with the `-r` flag.

Usage (Synchronous)

Registry v3.3.x

```
$ ./Console/cake job id_assigner -s --coid co [--object-type type [--object_id id]]
```

Registry v4.0.0 and later

This functionality is provided by the [Core Job Plugin](#).
