Identifier Assignment Job Plugin

The Identifier Assignment Job Plugin runs bulk Identifier Assignment for a CO.

Queued jobs will be processed by Registry Job Shell when run with the $-\mathtt{r}$ flag.

Configuration

1. This is a core plugin, and so is enabled by default.

Usage (Asynchronous)

This Job can be scheduled using the UI via CO > Configuration > Identifier Assignments > Autogenerate Identifiers For All.

Usage (Synchronous)

Registry v3.3.x

\$./Console/cake job id_assigner -s --coid co [--object-type type [--object_id id]]

Registry v4.0.0 and later

This functionality is provided by the Core Job Plugin.
