# University of Michigan Grouper Page

Slides from Wolverine Versus Grouper Presentation at Technology Exchange in Denver, December 2022

**Grouper 2.5.5 Integration**

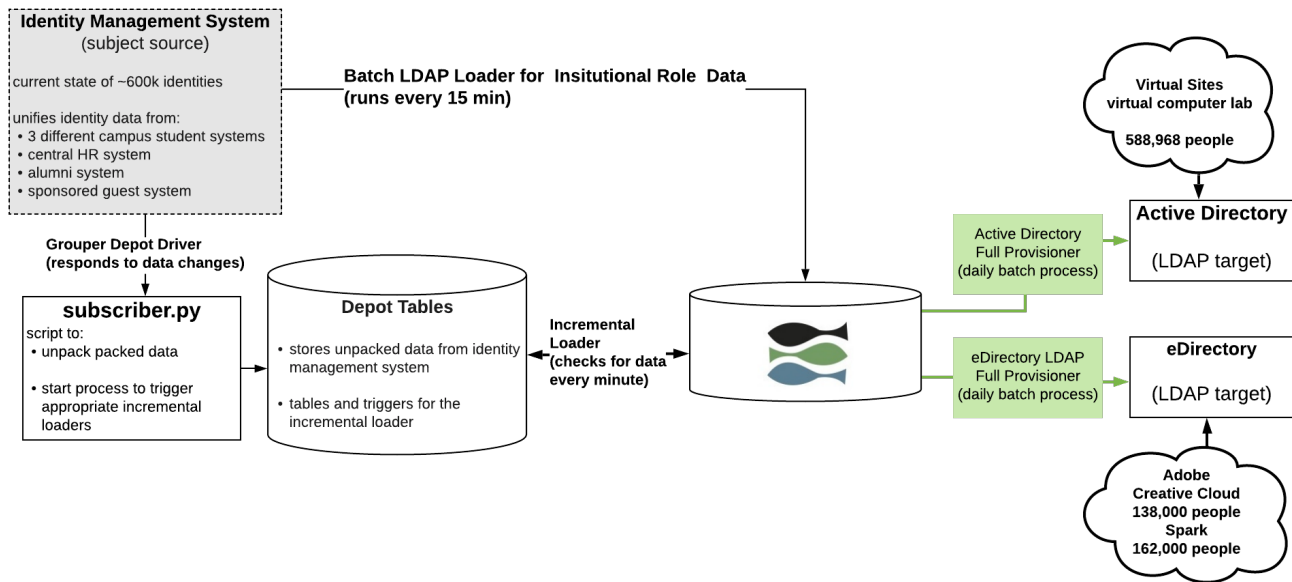

**Adobe Use Case**

Automated provisioning for Adobe Creative Cloud and Spark U-M licenses. Adobe access policy groups use reference groups with current Institutional Role data which are provisioned daily to eDirectory. Grouper also allows for a 30 day grace period before people who have lost their entitlement to Adobe licensing are removed.

**Virtual Sites Use Case**

Automated provisioning for Virtual Sites, a tool that allows faculty, staff, and students to access a full Campus Computing Sites Windows desktop virtual desktop from any device. Virtual Sites access policy group is composed of up-to-date institutional role data and automatically synced to Active Directory daily. There is a 30 day grace period before people who have lost their entitlement to Virtual Sites are removed.

**Grouper LDAP provisioner v2.5 use case Michigan** (December 2020)
