

CACTI Public Meeting Notes from 3-Sept-2019

CACTI call of Tuesday, Sept. 3, 2019

Attending

Members

- Chris Phillips, CANARIE (chair)
- Tom Barton, University of Chicago
- Rob Carter, Duke
- Nathan Dors, U Washington
- Karen Herrington, Virginia Tech
- Warren Anderson, University of Wisconsin-Milwaukee /LIGO
- Les LaCroix, Carleton College
- Matthew Economou, InCommon TAC Representative to CACTI

Internet2

- Kevin Mooroney
- Steve Zoppi
- Nick Roy
- Jessica Coltrin
- Mike Zawacki

Regrets

- Marina Adomeit, GEANT
- Jill Gemmill, Clemson
- Todd Higgins, Franklin & Marshall College
- Tom Jordan, University of Wisc - Madison
- Christos Kanellopoulos, GEANT
- Ann West, Internet2
- Emily Eisbruch, Internet2

Discussion

Trust and Identity Fall Review

- FIM4Rv2 Assessment for Internet2 Trust and Identity
 - <http://doi.org/10.26869/TI.112.1>
- Kevin will be attending FIM4R meeting Sept. 12, 2019 in Chicago at Fermilab.
 - <https://indico.fnal.gov/event/21374/>
- Kevin hopes to help FIM4R create broader channels for its messages
- One of CACTI's FIM4R recommendations was **"Assessments of the Internet2 trust and identity solutions be performed at predetermined intervals"**
- ChrisP developed a spreadsheet to start a **fall Trust and Identity review**.
- Chris encourages all CACTI members to contribute to the spreadsheet
- Thoughts and insights are welcome on structure and format. Feel free to contribute a comment (or question) in the strawman doc or add in a topic or item you don't see.
- Needle has moved somewhat since the initial recommendations <http://doi.org/10.26869/TI.112.1>
- **BaseCAMP (August 2019 in Milwaukee)** fit into the goal ("Expertise in the use and implementation of these solutions in the field should be cultivated"). BaseCAMP can be seen as one accomplishment

Collaboration as a Service

- Regarding the Priority Recommendation: **Invest in Areas to Support Collaboration-as-a-Service**, what is the activity around this?
- Is there movement towards CManage as a Service?
 - CILogon has some features of collaboration as a service, but CILogon has limited subscribership.
 - SteveZ: CACTI needs to define in what form Collaboration as a service should exist
- Suggestion to add info on where resources should be applied to advance each particular effort.
- **AARC** Blueprint is a foundation, there are multiple implementations, including **eduteams**, CILogon, SATOSA
- CManage is one approach.
 - CManage is not turnkey, enrollment flows must be defined, for example
- CACTI does not want to be in position of selecting winners and losers among "Collaboration as a Service" services and tools
- The Component Architects are looking at suggesting architectural patterns.
 - Hope to reduce number of variables for the community as the community has requested this.
 - Guidance is taken from the Collaboration Success Program experience. <https://www.incommon.org/academy/csp/>
 - Grouper Deployment Guide is a good example of providing guidance for the community. <http://doi.org/10.26869/TI.25.1>
 - Hope to provide other similar guidance documents for other elements of the architecture
- **OIDC** <https://openid.net/connect/>
 - Plugin for IDP was released earlier in 2019.

- Hackathon Sept 23 in Copenhagen in connection with Nordunet
- <https://wiki.refeds.org/pages/viewpage.action?pageId=44959235>
- **AI Nathan** summarize **OIDC** progress

Next CACTI Call: Tuesday, **Sept. 17, 2019**
