

# Sessions Worth Watching from Re:invent 2019

The great thing about AWS Re:Invent is that all the sessions get posted to YouTube 48 hours after they happen. These two sessions are especially relevant to NET+ AWS subscriber. Thanks to Mark Larsen for flagging these.

[Architecting security & governance across your landing zone \(SEC325-R2\) \(aka AWS Orgs OU configuration recommendations\)](#)

[AWS Transit Gateway reference architectures for many VPCs \(NET406-R1\)](#)

Feel free to post additional session videos in the comments below.
