University of Nebraska - Grace Period in Grouper

		Wiki Home	Grouper Release Announcements	Grouper Guides	Grouper Deployment Guide	Community Contributions	Internal Developer Resources
--	--	--------------	----------------------------------	-------------------	-----------------------------	----------------------------	---------------------------------

This info is from Advance CAMP session at 2019 Technology Exchange in New Orleans

https://docs.google.com/document/d/1iLbTbPe0qop0BW7L5nbEpYJY21vrg6l8nNdQMGU2DDk/edit

Also of interest, Grouper automatically managed recent memberships feature added in May 2020: https://spaces.at.internet2.edu/x/2wEOCg

Documentation from University of Nebraska on how to accommodate a 90 day grace period for employees.

This uses a rule through the Grouper UI, which adds a user to another group when their membership removes.

· contact Brett Bieber or Patrick Haugland for more info

Adding removed member to another group with expiration date (grace period group).

*Note these rule only triggers on users who are direct members of the access policy.

- 1. Create a grace period group for your access policy.
 - example "app:firefly:P:allows_denies:psc_90d_grace"
- 2. Navigate to the group you wish to add a grace period rule to and click More | Attribute assignments
 - example "ref:hr:pa:6700:Employee"
- 3. Click the + Assign Attribute button and add in the following attribute assignment:
 - etc:attribute:rules:rule
- 1. Now click on the actions button to the right of the rule attribute that has been added and select "Add metadata assignment. Do this for each of the following attributes
 - etc:attribute:rules:ruleActAsSubjectId
 - Set value to "GrouperSystem"
 - etc:attribute:rules:ruleActAsSubjectSourceId
 - Set value to "g:isa"
 - etc:attribute:rules:ruleCheckOwnerName
 - Set value to Group ID Path ex "ref:hr:pa:6700:Employee"
 - etc:attribute:rules:ruleCheckType
 - Set value based on type of membership change
 - New member being added "membershipAdd"
 - Member being removed "membershipRemove"
 - New member in a nested group "flattenedMembershipAdd"
 - Member being removed from a nested group "flattenedMembershipRemove"
 - etc:attribute:rules:ruleIfOwnerName
 - Set value to Group ID Path ex "ref:hr:pa:6700:Employee"
 - etc:attribute:rules:ruleThenEl
 - Set value to \${ruleElUtils.assignMembershipDisabledDaysForGroupId("groupId", memberId, X, true)}
 - Replace **groupId** with to the **UUID** of your grace period group
 - example: f1453bf852354be9a2a8cc8cfff58c84
 - Replace X with the number of days you want them to be in the grace period group.
 - example: 90
 - The resulting value should look something like.
 - \$\text{fruleE|Utils.assignMembershipDisabledDaysForGroupId("f1453bf852354be9a2a8cc8cfff58c84", memberId, 90, true)}

^{*}When you're done it should look something like this
