API / Governance WG 2019-2020 Call Program

Unless otherwise noted, sessions are conference calls.

The ITANA API / Governance Working Group is reviewing API design best practices, governance, technologies and resources for higher education.

Date	Track	Session	Format/Mode	Presenter / Facilitator	Materials / Notes	Confirmed
January 9		Roundtable - Planning for future topics		Roundtable		
February 12		University Un-conference		Matthew Hailstone		
March 12		Apache Nifi Roll out @ UCSD		Ashish Pandit		
April 9		ITS response to COVID-19		Roundtable		
May 7		Data Governance		Mark Skweres	Video Recording Slides	
June 11		Data Governance II		Mona Guerra Matthew Hailstone (BYU)	Recording	

Potential Future Topics

- Onboarding of developers to api management
  Data access
  API Lifecycle
  API SDLC - who gets to create apis.

  Topics of Interest
  Microservices

  Transitional services to APIs (Direct data stores access, DB, LDAP...etc)

  Enterprise Data Objects, integration assets and Metadata repository

  Data Modeling, tools, mappings and best practices

  DevOps (automation, monitoring, deployment...etc)

  Legacy file interfaces (Does it belong in SOA & Transition strategy?)

  Developer engagement model

  Domain of One's Own
  Additional topics

  Integration in modern enterprise architecture
