

Onboard Grouper developer

1. Request to Grouper lead
 - a. Add to groups in <https://grouper.at.internet2.edu/>
 - b. Grouper lead request to I2 staff member
2. Need to new dev public SSH key
3. Need username for unix
4. All requests coming from same IP address (or cidr)?
5. Need github username

Internet2 will

1. Give commit access to github for Bill
2. Add account to login.internet2.edu server
3. Add account to i2mdev6
4. Give sudo root or whatever groups other devs have
5. Add account to software.internet2.edu
6. Give same groups as other grouper devs. Is there a setgid bit or something so we can share files?

Test:

1. ssh to login.internet2.edu with your key.

```
Add this under .ssh/config on login.internet2.edu
```

```
Host *  
    ForwardAgent    yes
```

2. From login.internet2.edu, try to ssh to i2mdev6.
3. From i2mdev6 try to: sudo su -
4. From login.internet2.edu, try to ssh to webprod3.
5. From webprod3, create and delete a file here:

 /home/htdocs/software.internet2.edu/grouper/release/2.3.0
6. Is the group of the file you created grouperdist, and was it group writable?

Hints:

1. Once setup and in system email techsupport@internet2.edu for help
