

Getting Started with Grouper

Wiki Home	Grouper Release Announcements	Grouper Guides	Grouper Deployment Guide	Community Contributions	Internal Developer Resources
---------------------------	---	--------------------------------	--	---	--

If you are looking at setting up an instance of Grouper we recommend starting with the [Grouper Deployment Guide](#). The rest of the information below is supplemental information that may help along the way.

The Grouper Book was started in 2011 by a community member, but not completed. It aimed to provide documentation on Grouper which could take people from beginner to expert. It was to supplement and summarize existing documentation which is actively updated. Contributions and comments from the Grouper community are welcome.

Sections on the Wiki will be marked in one of 4 stages:

- Blank - no real content yet
- Draft - initial drafts
- Reviewed - has been reviewed for accuracy (technical and linguistic)
- Completed - finished (at least for the current version)

Table of Contents

- Part 1 - Introductory Information - draft
 - [What is Grouper and what can it do?](#) - draft
 - SQL database
 - Grouper API
 - Web Interface
 - Provisioning
 - [How could Grouper be useful to me? Typical use-cases](#) - blank
 - [What is Internet2 and where does Grouper fit into it?](#) - blank
- Part 2 - Grouper core
 - Exploring Grouper
 - [Find a folder or a group by navigation](#)
