

# GrouperBook

<a href="#">Wiki Home</a>	<a href="#">Grouper Release Announcements</a>	<a href="#">Grouper Guides</a>	<a href="#">Grouper Deployment Guide</a>	<a href="#">Community Contributions</a>	<a href="#">Internal Developer Resources</a>
---------------------------	---	--------------------------------	--	---	--

The Grouper Book is being "written" in sections off-line and being added to the Wiki in draft form. It aims to provide documentation on Grouper which can take people from beginner to expert. It supplements and summarizes existing documentation, simplifying and providing background where appropriate. Contributions and comments from the Grouper community are welcome!

## Table of Contents

- Part 1 - Introductory Information - draft
  - [What is Grouper and what can it do?](#)
    - SQL database
    - Grouper API
    - Web Interface
    - Provisioning
  - How could Grouper be useful to me? Typical use-cases - blank
  - What is Internet2 and where does Grouper fit into it? - blank
- Part 2 - Grouper core
  - Case studies - blank
  - Setting up Grouper - blank
  - Exploring Grouper - blank
    - [Find a folder or a group by navigation](#)
    - [Find an entity or a group by searching](#)
    - [Read a group's membership list](#)
