

# be2-consultation

## Community Review

This consultation is now closed. It was open from September 8, 2020 to October 19, 2020.

### Background

The InCommon Community Trust and Assurance Board (CTAB) invites you to participate in a consultation on the proposed process for the next round of Baseline Expectations.

- The first document (BE2) describes the three new expectations for each of the three types of Federation actors: Identity Provider, Service Provider, and Federation Operator.
- The second document (Implementation Guidance and Best Practices) provides useful information on updating systems to adhere to the new expectations.

### Documents for Review/Consultation

BE2 [Baseline Expectations for Trust in Federation, version 2.0](#)

PRACTICES [Implementation Guidance and Best Practices for Baseline Expectations 2](#)

### What is a consultation?

Working groups and advisory groups produce reports, recommendations, standards, best practices, and related documents. These are then provided to the community for review in the form of a consultation. In addition, policy and other documents developed by Internet2 Trust and Identity division staff may undergo the community consultation process to gather broader input and awareness before becoming finalized.

### Change Proposals and Feedback - We welcome your feedback/suggestions here

If you have comments that do not lend themselves well to the tabular format below, please create a new Google doc and link to it in the "Proposed Text /Query/Suggestion column below

Number	Document	Current Text	Proposed Text / Query / Suggestion	Proposer	+1 (add your name here if you agree with the proposal)	Action
1	PRACTICES	All mentions of "Qualys"	Replace the use of a specific vended product, with a standard. The standard in use by Qualys is the most current version of their SSL Server Rating Guide: <a href="https://github.com/ssllabs/research/wiki/SSL-Server-Rating-Guide">https://github.com/ssllabs/research/wiki/SSL-Server-Rating-Guide</a>	Nic Roy	+1 SZoppi +1 DABantz	CTAB accepts this recommendation and has updated the Implementation Guide accordingly.
