Registry 3.3.1 Release Announcement

Internet2 and the COmanage Project are pleased to announce the release of COmanage Registry version 3.3.1. This release is a maintenance release. This version contains various bug fixes.

We recommend all deployments upgrade to this release.

A Security Advisory is being posted along with this release. This Advisory does not describe a code vulnerability, but rather a potential configuration that may produce unintuitive results. Further details are posted to the COmanage Registry Security Advisories page.
