

Service Evaluation Updates - December 2020

Palo Alto Networks Service Evaluation Update

NET+ Palo Alto Networks service evaluation has continued since the last quarterly update and is completing a service evaluation on Palo Alto Prisma Access, Cloud, Security Operations Automation, Next-Generation Endpoint,

and Network Detection and Response. The NET+ Palo Alto program held an Internet2 NET+ Palo Alto - Enabling Secure Remote Learning for International Students Community Call and the [recording](#), [slides](#), and [Palo Alto Prisma Access Service](#) for international students resources are available.

CloudChecker Premium Update

NET+ CloudCheckr Premium service evaluation has entered the final stages, with agreement negotiations underway. This offering will include total visibility for cloud spending across the three most highly adopted cloud infrastructure providers: AWS, Microsoft Azure, and Google Cloud Platform. Service features will include delegation of access to individual account owners on a campus, access to APIs to automate billing reports, and provide visibility to the security posture of a campus' cloud footprint. The program is expected to launch in early 2021.

GSEfE Update: Amplified IT and Burwood conditionally selected as Resellers for GSuite Enterprise for Education (GSEfE)

The [NET+ GSuite Enterprise for Education \(GSEfE\)](#) Service Evaluation participating schools have completed the security, identity, accessibility, and functional evaluation of the platform. Amplified IT and Burwood were selected as Resellers for the NET+ program via a competitive process in November 2020. Agreement negotiations with Google and the two Resellers are underway, and the program is expected to go live in the early part of 2021.

NET+ airSlate/signNow to join the NET+ Program

With support from Claremont Graduate University, [airSlate/signNow](#) is expected to enter the NET+ Program as a pre-evaluation NET+ service in the early part of 2021. Services include an e-signature solution, workflow automation software, document generation, and more. A pre-service evaluation agreement will be available soon. Representatives from Claremont Graduate University, University of Rhode Island, and University of Michigan have joined the Early Adopters group to help drive the product roadmap for our Higher Education community, ensuring airSlate/signNow meets the NET+ program standards. If you are interested in more information or would like to join the Early Adopters Group please contact Dana Voss.
