

# GrouperShell (gsh) Provisionable groups finder (ProvisionableGroupFinder)

<a href="#">Wiki Home</a>	<a href="#">Grouper Release Announcements</a>	<a href="#">Grouper Guides</a>	<a href="#">Grouper Deployment Guide</a>	<a href="#">Community Contributions</a>	<a href="#">Internal Developer Resources</a>
---------------------------	---	--------------------------------	--	---	--

Use this class to find provisioning attributes on groups

Sample call

```
ProvisionableGroupFinder provisionableGroupFinder = new ProvisionableGroupFinder();
GrouperProvisioningAttributeValue attributeValue = provisionableGroupFinder.assignGroup(group).
assignTargetName("ldapProvTest")
.findProvisionableGroupAttributeValue();
```

Sample call to find multiple provisioning attributes on a group

```
ProvisionableGroupFinder provisionableGroupFinder = new ProvisionableGroupFinder();
Set<GrouperProvisioningAttributeValue> provisionableStemAttributeValues =
provisionableGroupFinder.assignGroupName(group.getName()).
findProvisionableGroupAttributeValues();
```

## Options
